

Institutional-quality crypto asset data with a focus on comprehensive coverage, accuracy, and quality.

Lukka's technology is built within an AICPA SOC 1 Type II and SOC 2 Type II infrastructure and provides a comprehensive, secure, and scalable infrastructure for your crypto middle and back-office.

Lukka Prime Pricing Data

Fair Market Value (FMV) pricing and valuation data for crypto assets.

- FMV Pricing for 1000+ Crypto Assets
- Sourced from 10+ Exchanges
- 7+ Years of History

In the absence of a primary market, closing day, and other traditional factors needed to determine the FMV of an asset, Lukka Prime is designed to align to GAAP and IFRS guidelines in order to support post-trade reporting.

Lukka Reference Data

- 14,000+ Crypto Spot Assets
- 70,000+ Crypto Derivatives
- 300+ Data Sources (Included DEX & DeFi)
- 45,000+ Trading Pairs
- 7+ years of mapping history

Lukka Reference Data is a comprehensive set of security masters from exchanges and other sources across the crypto ecosystem that standardizes crypto-asset names, tickers, trading pairs, and more. With the absence of traditional identifiers, we've created the Lukka ID (LID) to assign standard tickers to all assets.

Lukka Digital Asset Classification Standard ("LDACS™")

- 7000+ Assets Classified
- 5 Tiers of Hierarchical Taxonomy
- 100+ Subsector Classifications

LDACS™ is a detailed and comprehensive digital asset classification structure consisting of a five-tier hierarchical taxonomy with the purpose of improving transparency and efficiency in assessing and analyzing digital assets.

Crypto Actions

- 14,000+ Tracked Assets
- 20+ Types of Crypto Actions Tracked
- 300+ Data Sources

A comprehensive feed of crypto asset updates such as hardforks, softforks, ticker changes, exchange listings/delistings, and other important ecosystem events. Receive a feed of standardized, machine-readable crypto actions.
