

The most
institutionally
vetted solution
on the market.

As digital asset markets mature, derivatives have become essential for liquidity provision, hedging, structured products, treasury management, and risk transfer. Success depends on reliable pricing inputs, consistent market assumptions, transparent methodologies, and institutional-grade risk infrastructure. Lukka provides the market intelligence and analytics that trading desks, risk teams, and market makers rely on to price, monitor, and manage digital asset derivatives with confidence.

Market Intelligence & Pricing Signals

OneFi — The Source of Financial Truth

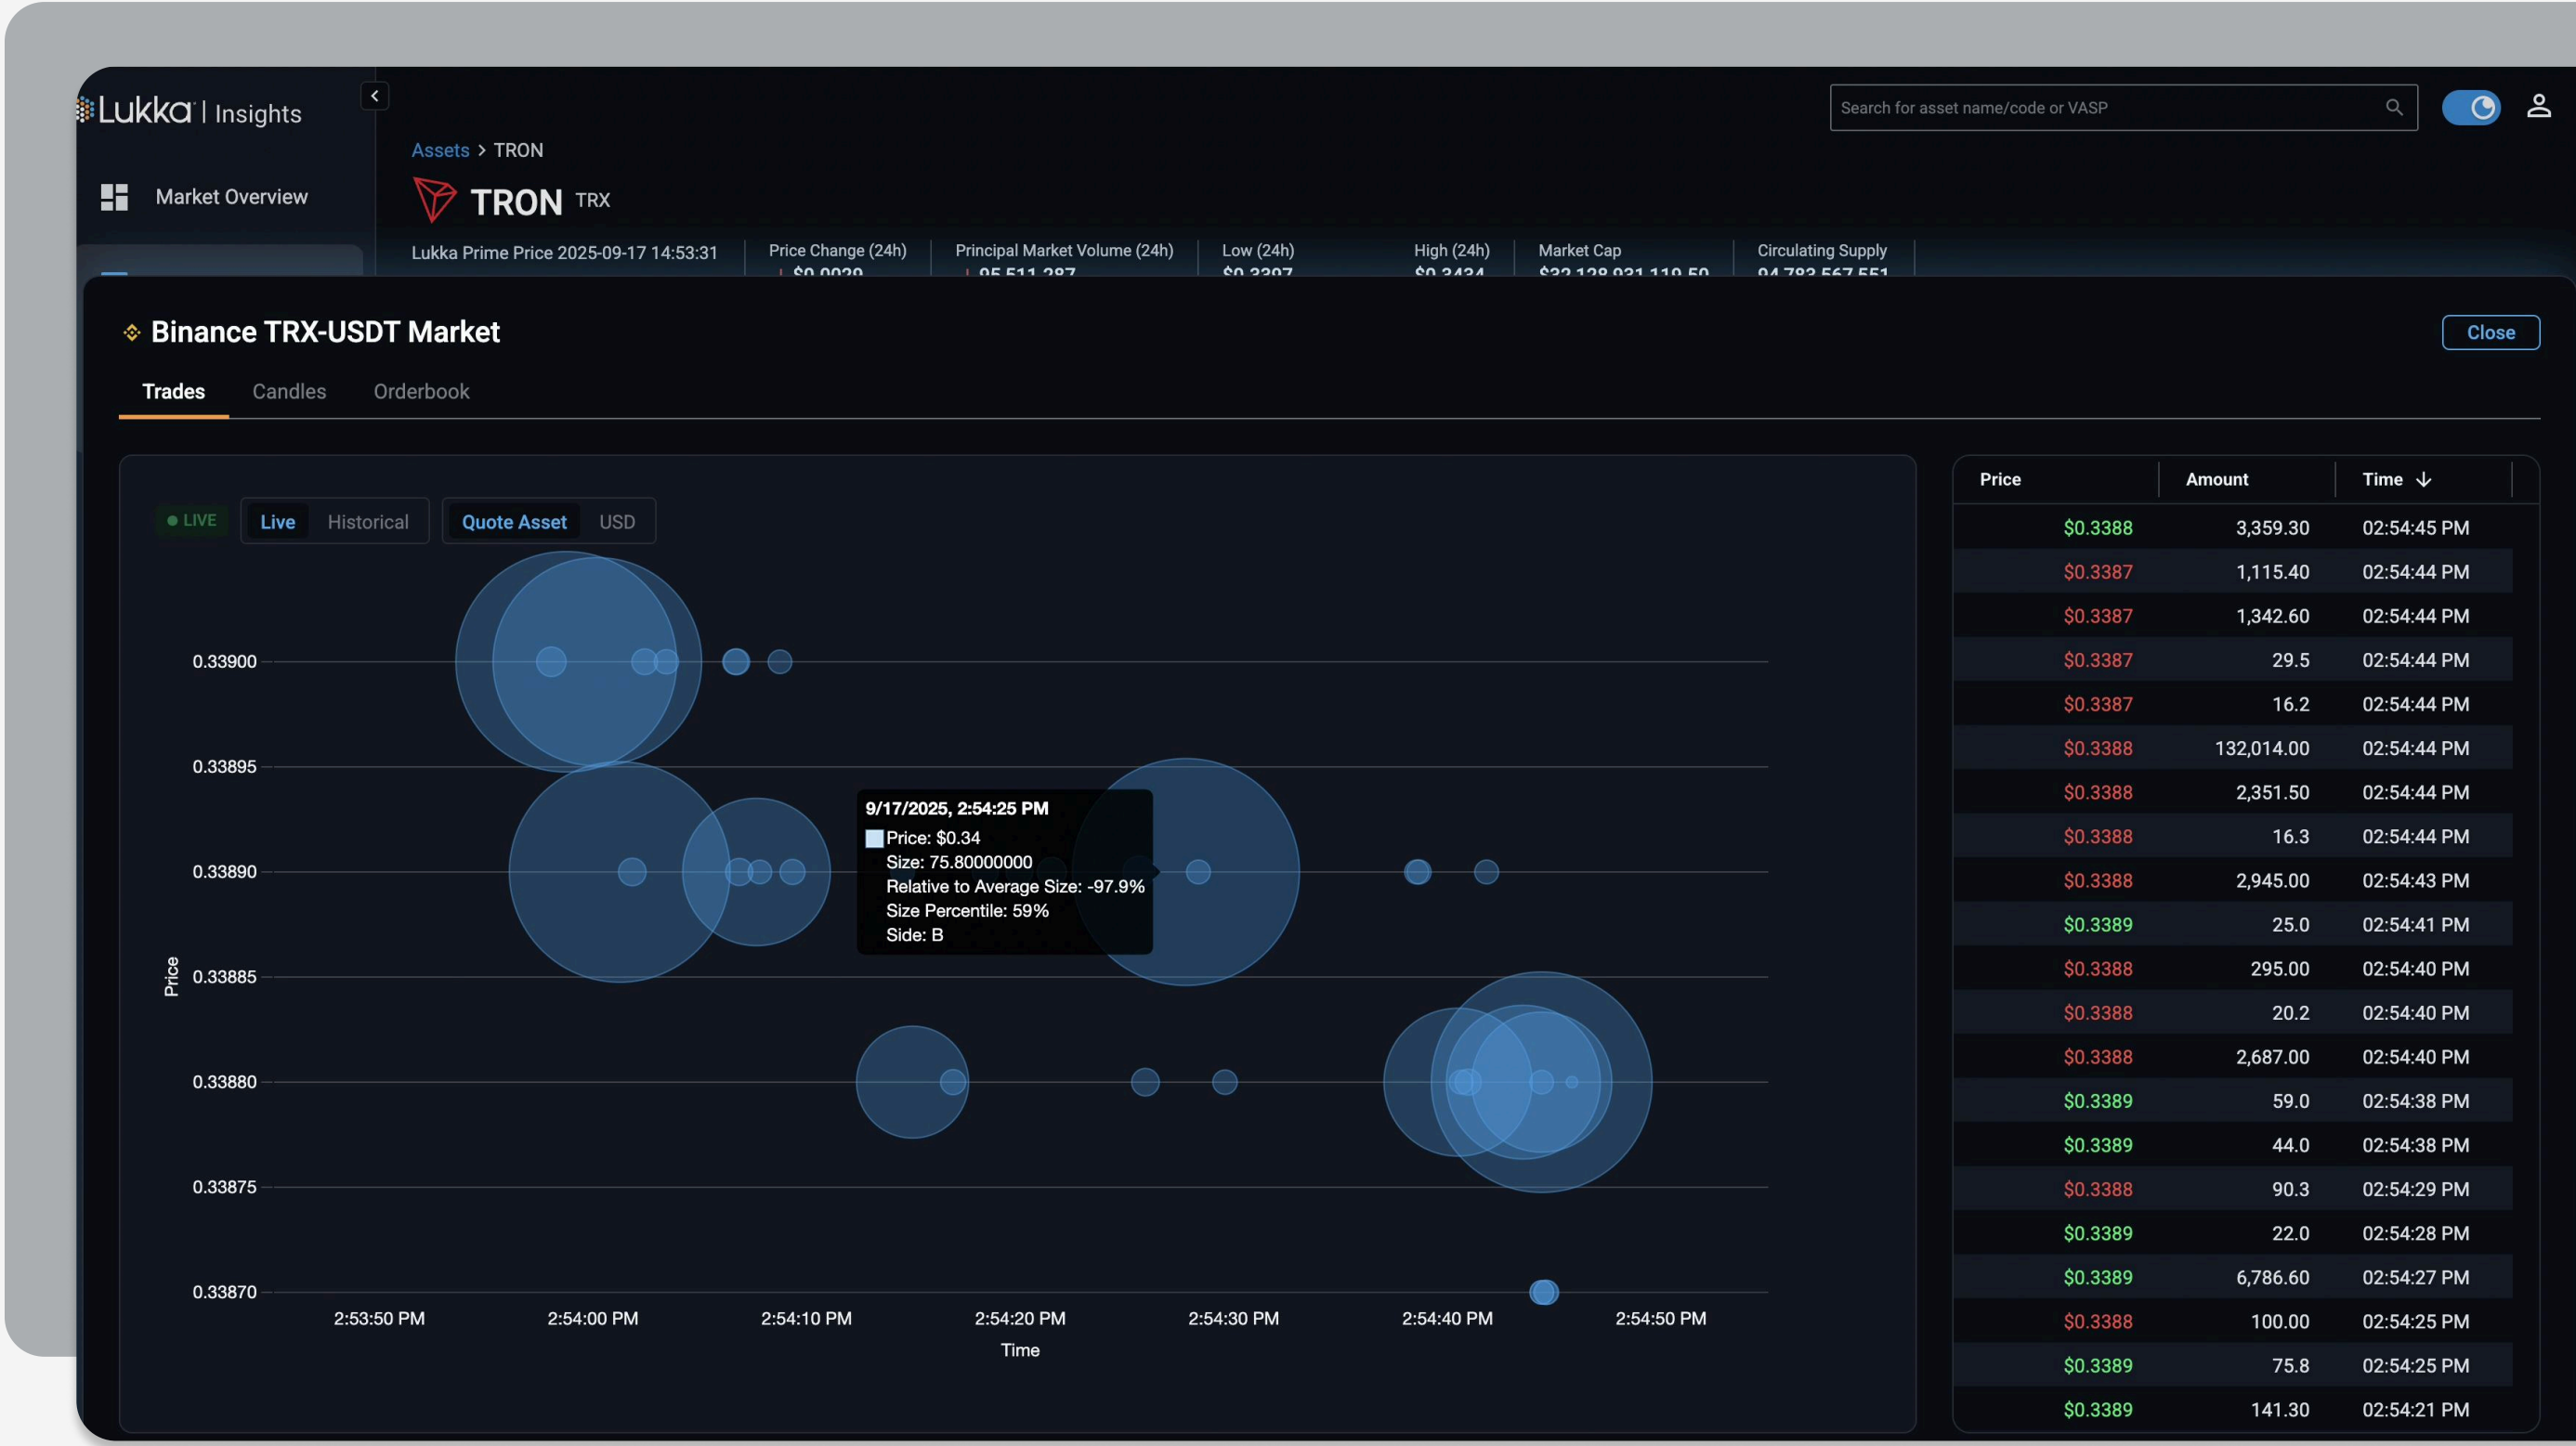

Transform fragmented exchange, options, futures, and market activity into a standardized foundation for derivatives pricing and risk management.

Institutional Volatility Intelligence

Generate implied volatility surfaces derived from observable options markets to support pricing, hedging, valuation, and scenario analysis.

Crypto-Native Rate Curves

Deliver market-implied interest rate curves built from futures and options activity where traditional benchmarks do not exist.

Trading & Valuation Infrastructure

Consistent Pricing Inputs

Apply transparent, market-derived assumptions across OTC options, structured products, swaps, futures, and bespoke derivatives.

Aggregated & Venue-Specific Intelligence

Access both consolidated market views and venue-level intelligence depending on pricing, execution, and trading requirements.

Valuation Confidence

Support fair value measurement, independent price verification, and portfolio valuation through defensible institutional methodologies.

Risk Analytics & Exposure Management

Market-Based Risk Frameworks

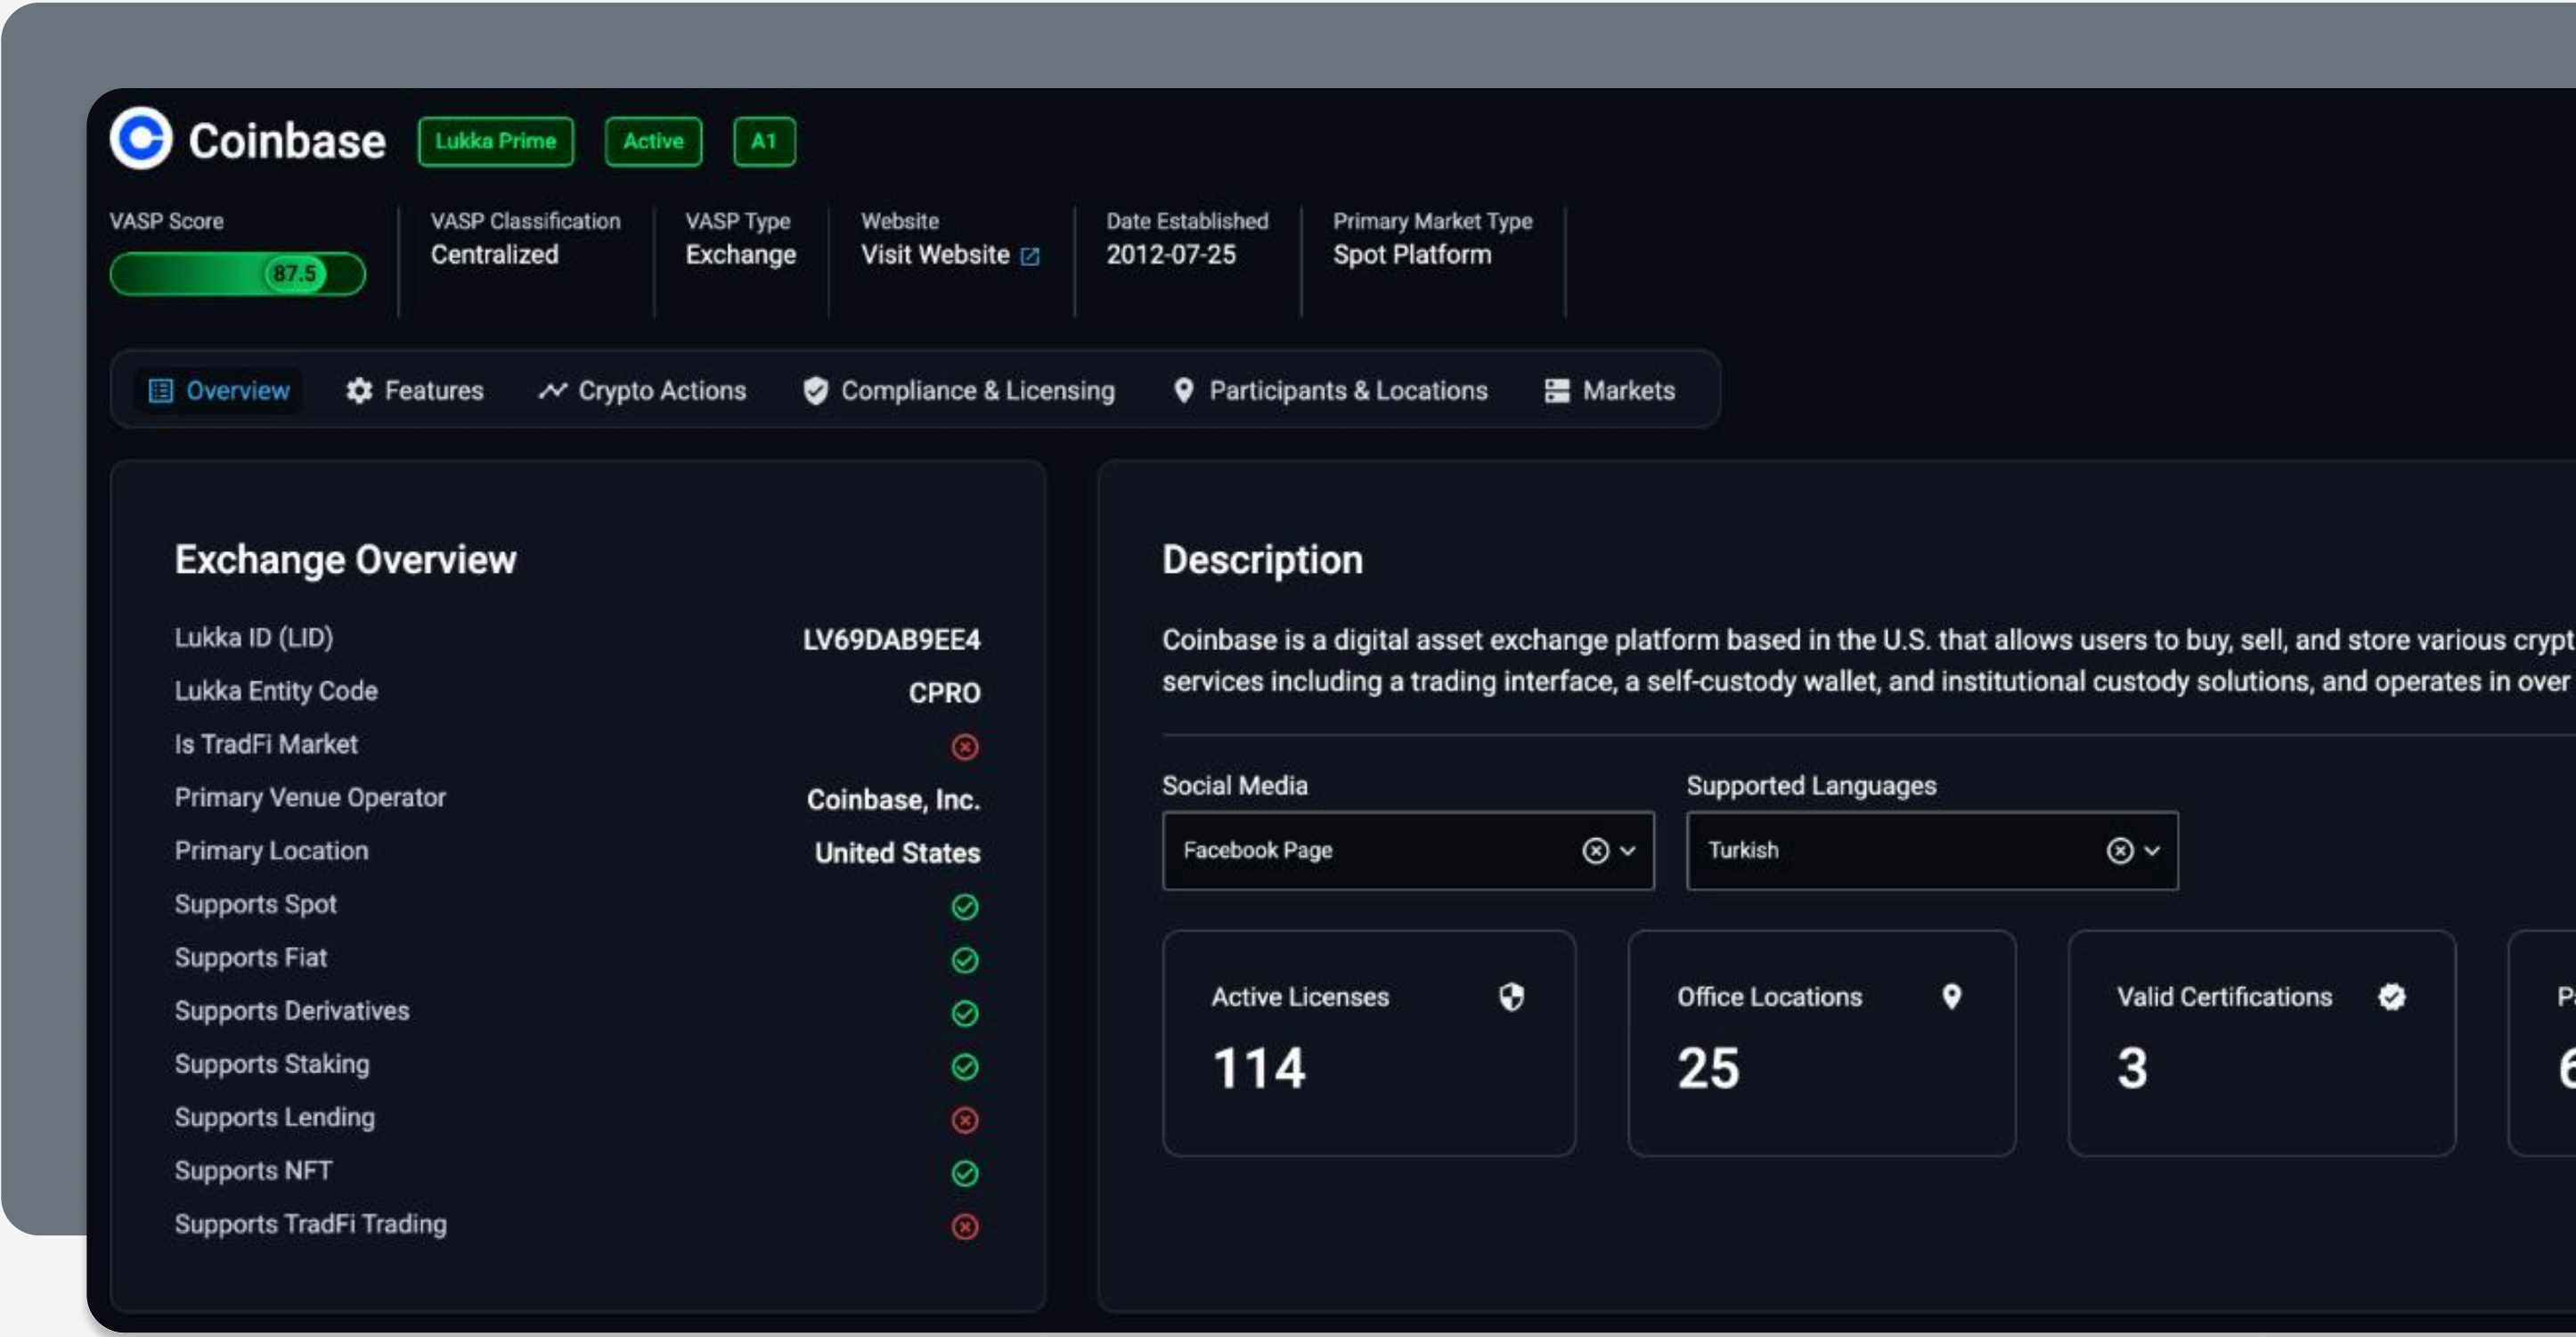

Use implied volatility and rate signals to strengthen VaR calculations, sensitivity analysis, exposure monitoring, and portfolio oversight.

Scenario & Stress Testing

Model volatility shocks, rate changes, liquidity events, and market dislocations using real derivatives market behavior.

Cross-Product Consistency

Align assumptions across spot, futures, options, structured products, and OTC positions through a unified market intelligence framework.

Trading Intelligence

Lukka Intelligence

Transform pricing, market, derivatives, and ecosystem data into actionable intelligence for trading, treasury, and risk teams.

Portfolio & Market Insights

Monitor volatility regimes, market structure shifts, liquidity conditions, and emerging trading opportunities through a unified intelligence platform.

AI-Ready Analytics

Deliver trusted intelligence through APIs, MCP-enabled workflows, quantitative research environments, copilots, agents, and enterprise trading systems.

Digital Asset Data You Can Trust

All of Lukka's products are created with institutional standards, such as AICPA Service and Organization Controls (SOC), which focus on data quality, financial calculation accuracy & completeness, and managing technology operational risk. Lukka has obtained AICPA SOC 1 Type II and SOC 2 Type II Audits, an ISO/IEC-27001 certification, NIST Cybersecurity Assessment, and continues to lead the industry with best in class technology risk governance.
