

The most institutionally vetted solution on the market.

As digital assets evolve beyond crypto into tokenized securities, funds, stablecoins, and real-world assets, custodians face increasing demands for transparency, governance, and operational scale. Success requires trusted asset intelligence, auditable financial records, compliant counterparties, and infrastructure that can adapt to new market structures. Lukka provides the institutional foundation that helps custodians onboard assets faster, strengthen controls, reduce operational risk, and confidently support the future of digital finance.

Asset Intelligence & Financial Truth

OneFi — The Source of Financial Truth

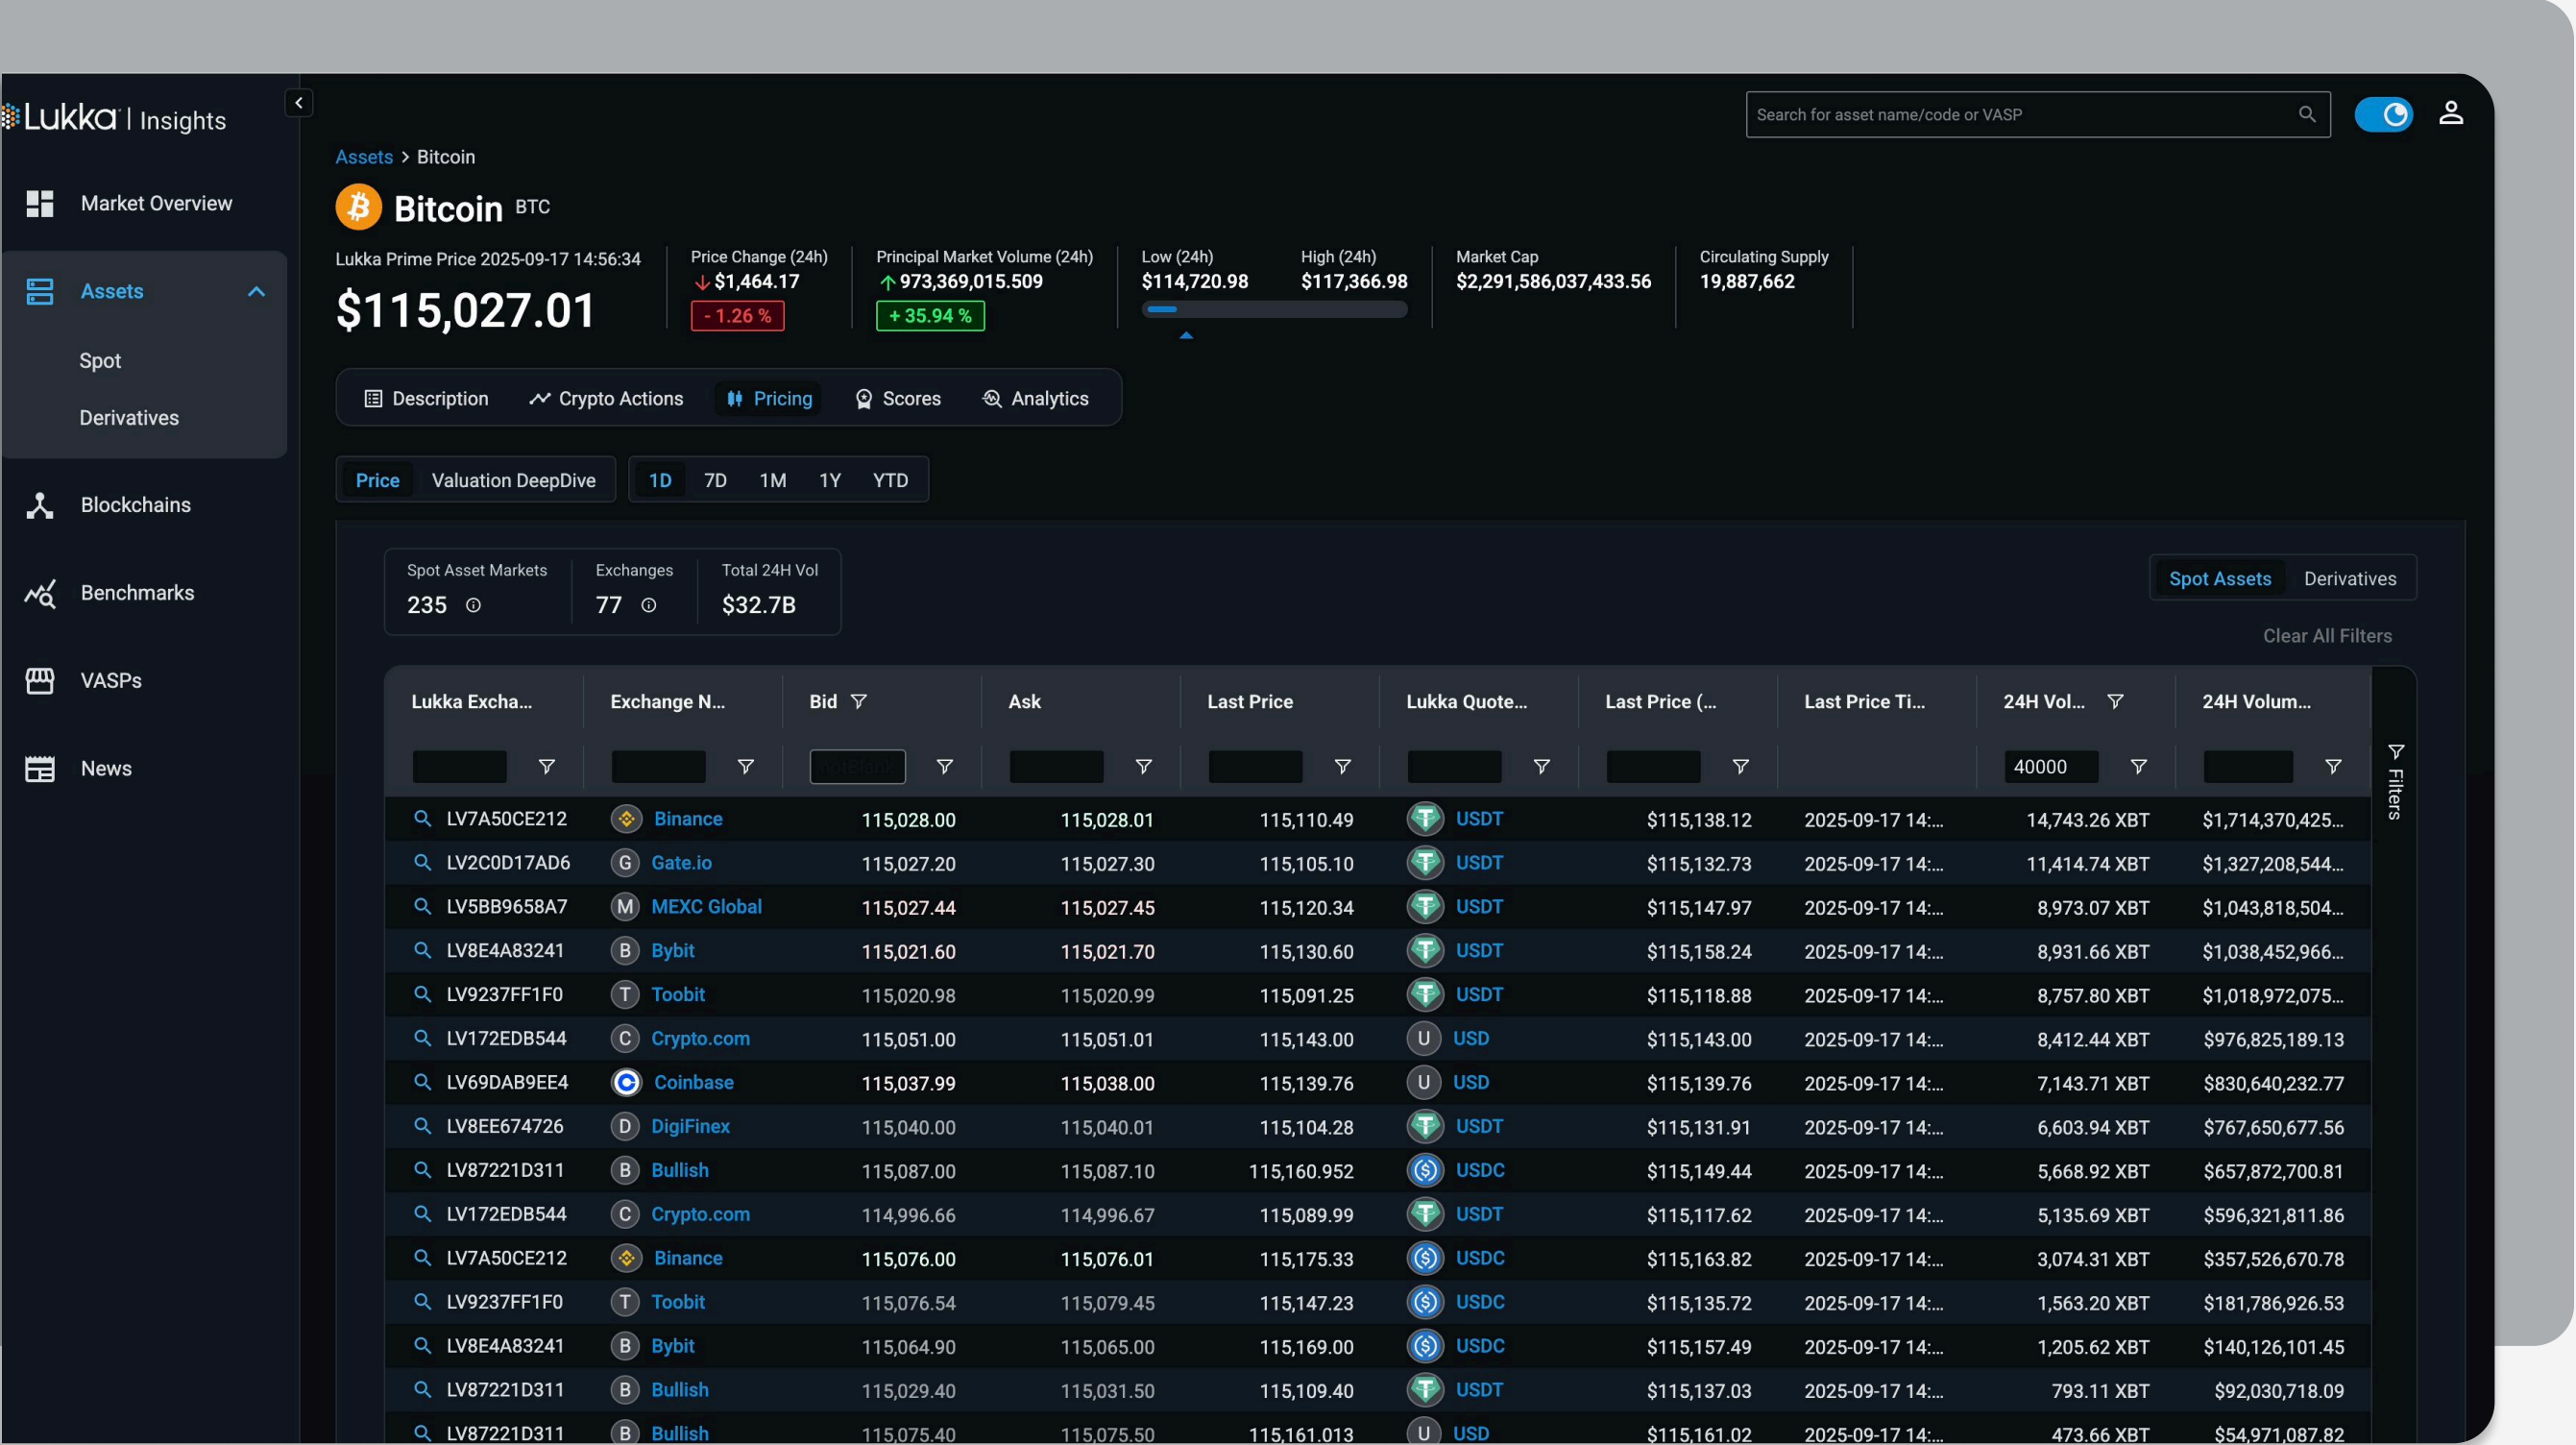

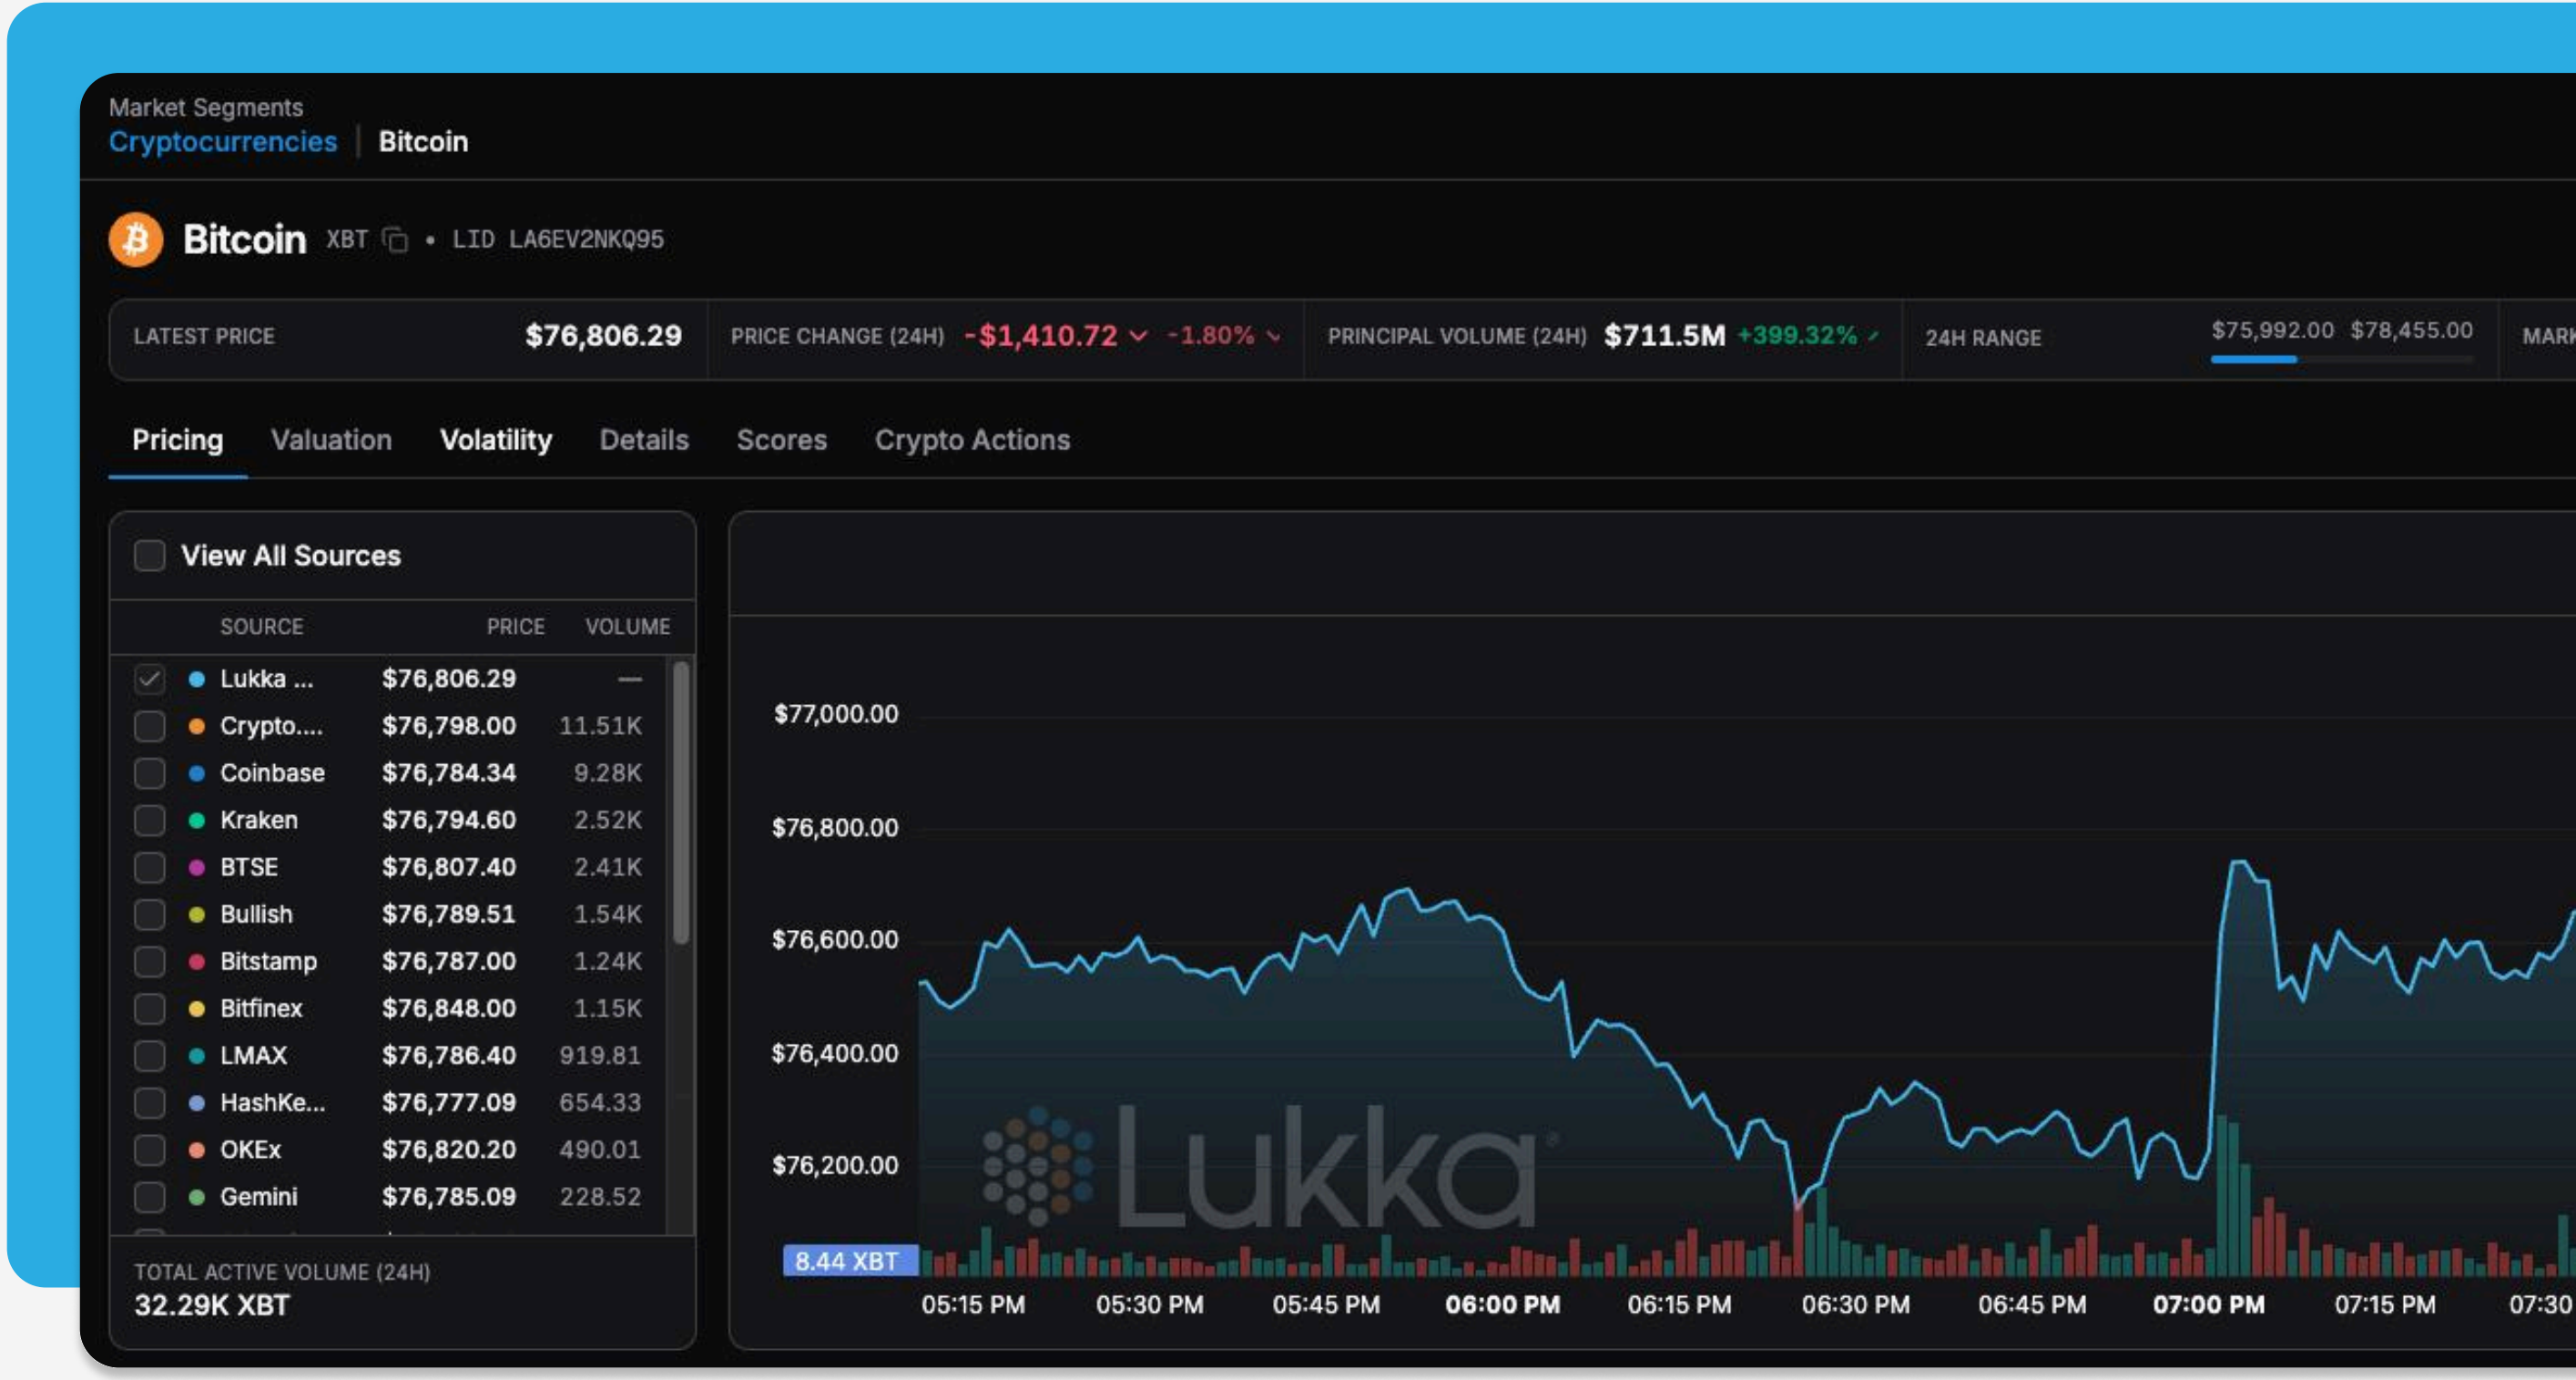

Create a unified digital book of record across custodial accounts, blockchains, exchanges, and financial systems.

Institutional Pricing & Valuation

Deliver audit-grade pricing and valuation methodologies across digital assets, tokenized securities, funds, stablecoins, and emerging asset classes.

Asset Lifecycle Intelligence

Monitor listings, delistings, forks, migrations, rebrands, and token lifecycle events that impact custody operations and client reporting.

Trust, Risk & Compliance

VASPClear — The Source of Counterparty Trust

Establish trusted relationships across exchanges, brokers, issuers, liquidity providers, and digital asset ecosystem participants.

Counterparty Intelligence

Evaluate licensing, jurisdictional, ownership, and operational information to support onboarding and ongoing risk monitoring.

Regulatory Confidence

Support AML, sanctions, governance, audit, and compliance requirements through transparent and defensible institutional data infrastructure.

Custody Operations & Asset Servicing

Accelerate Asset Onboarding

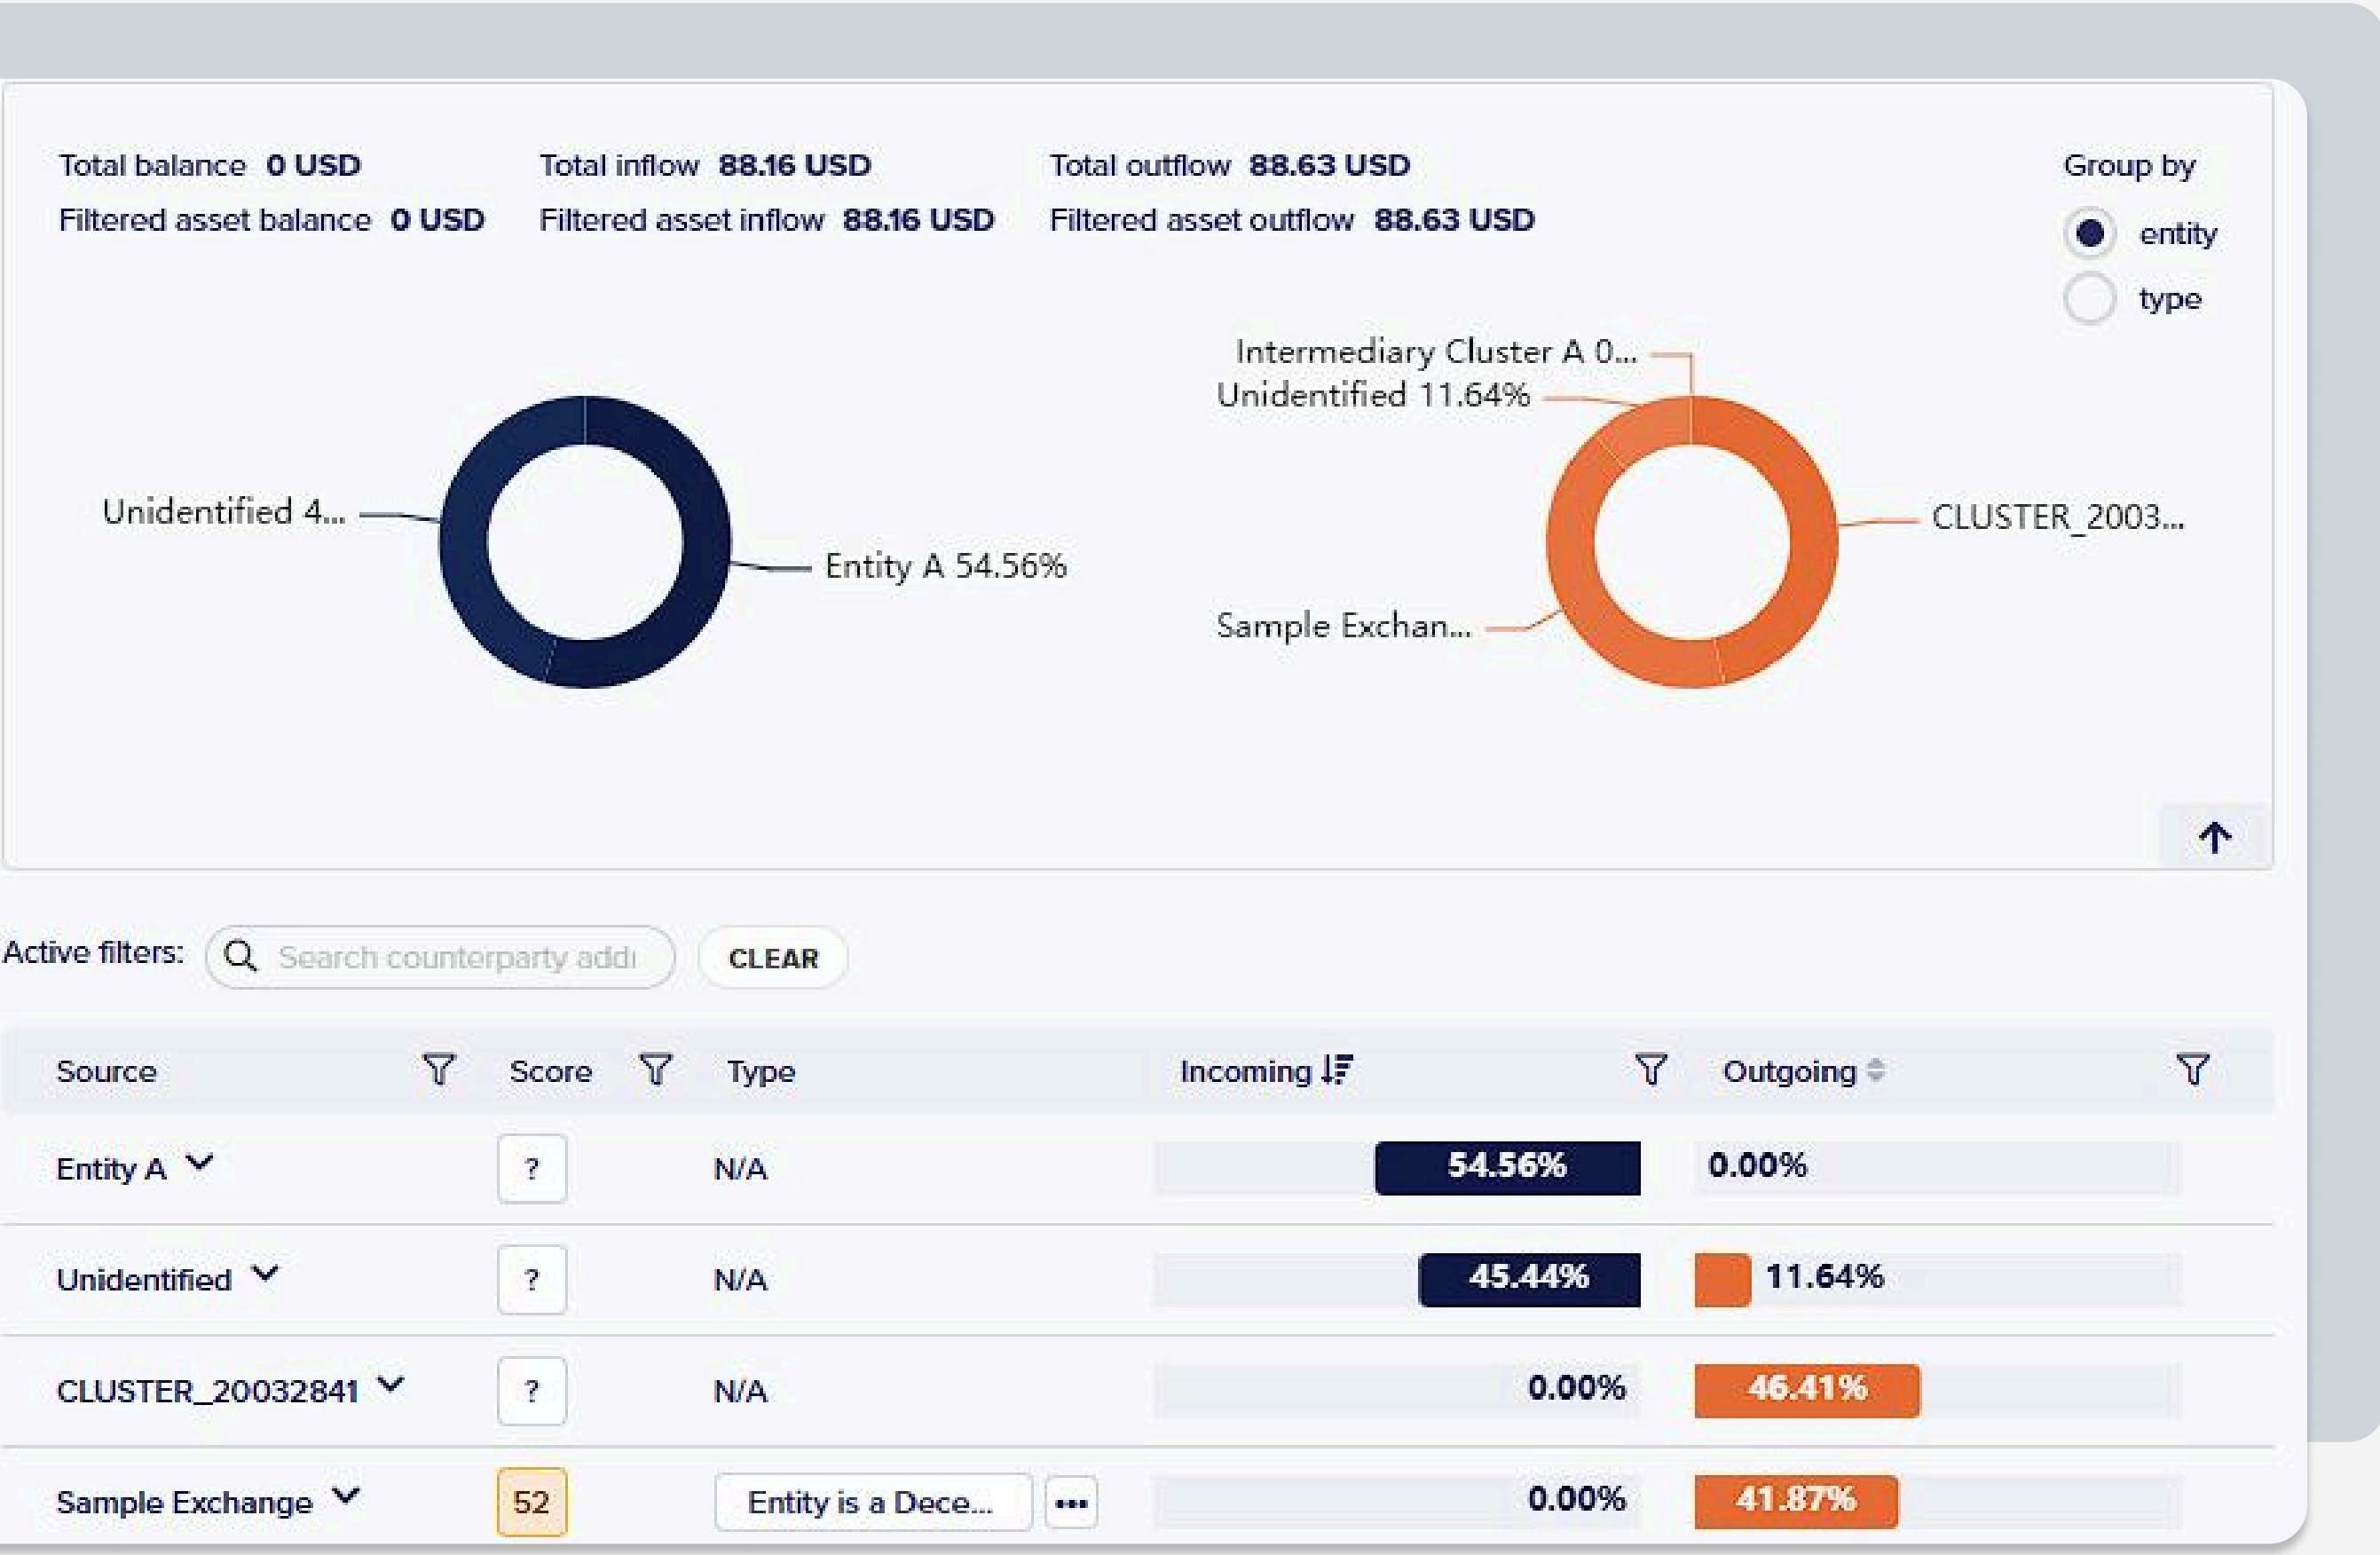

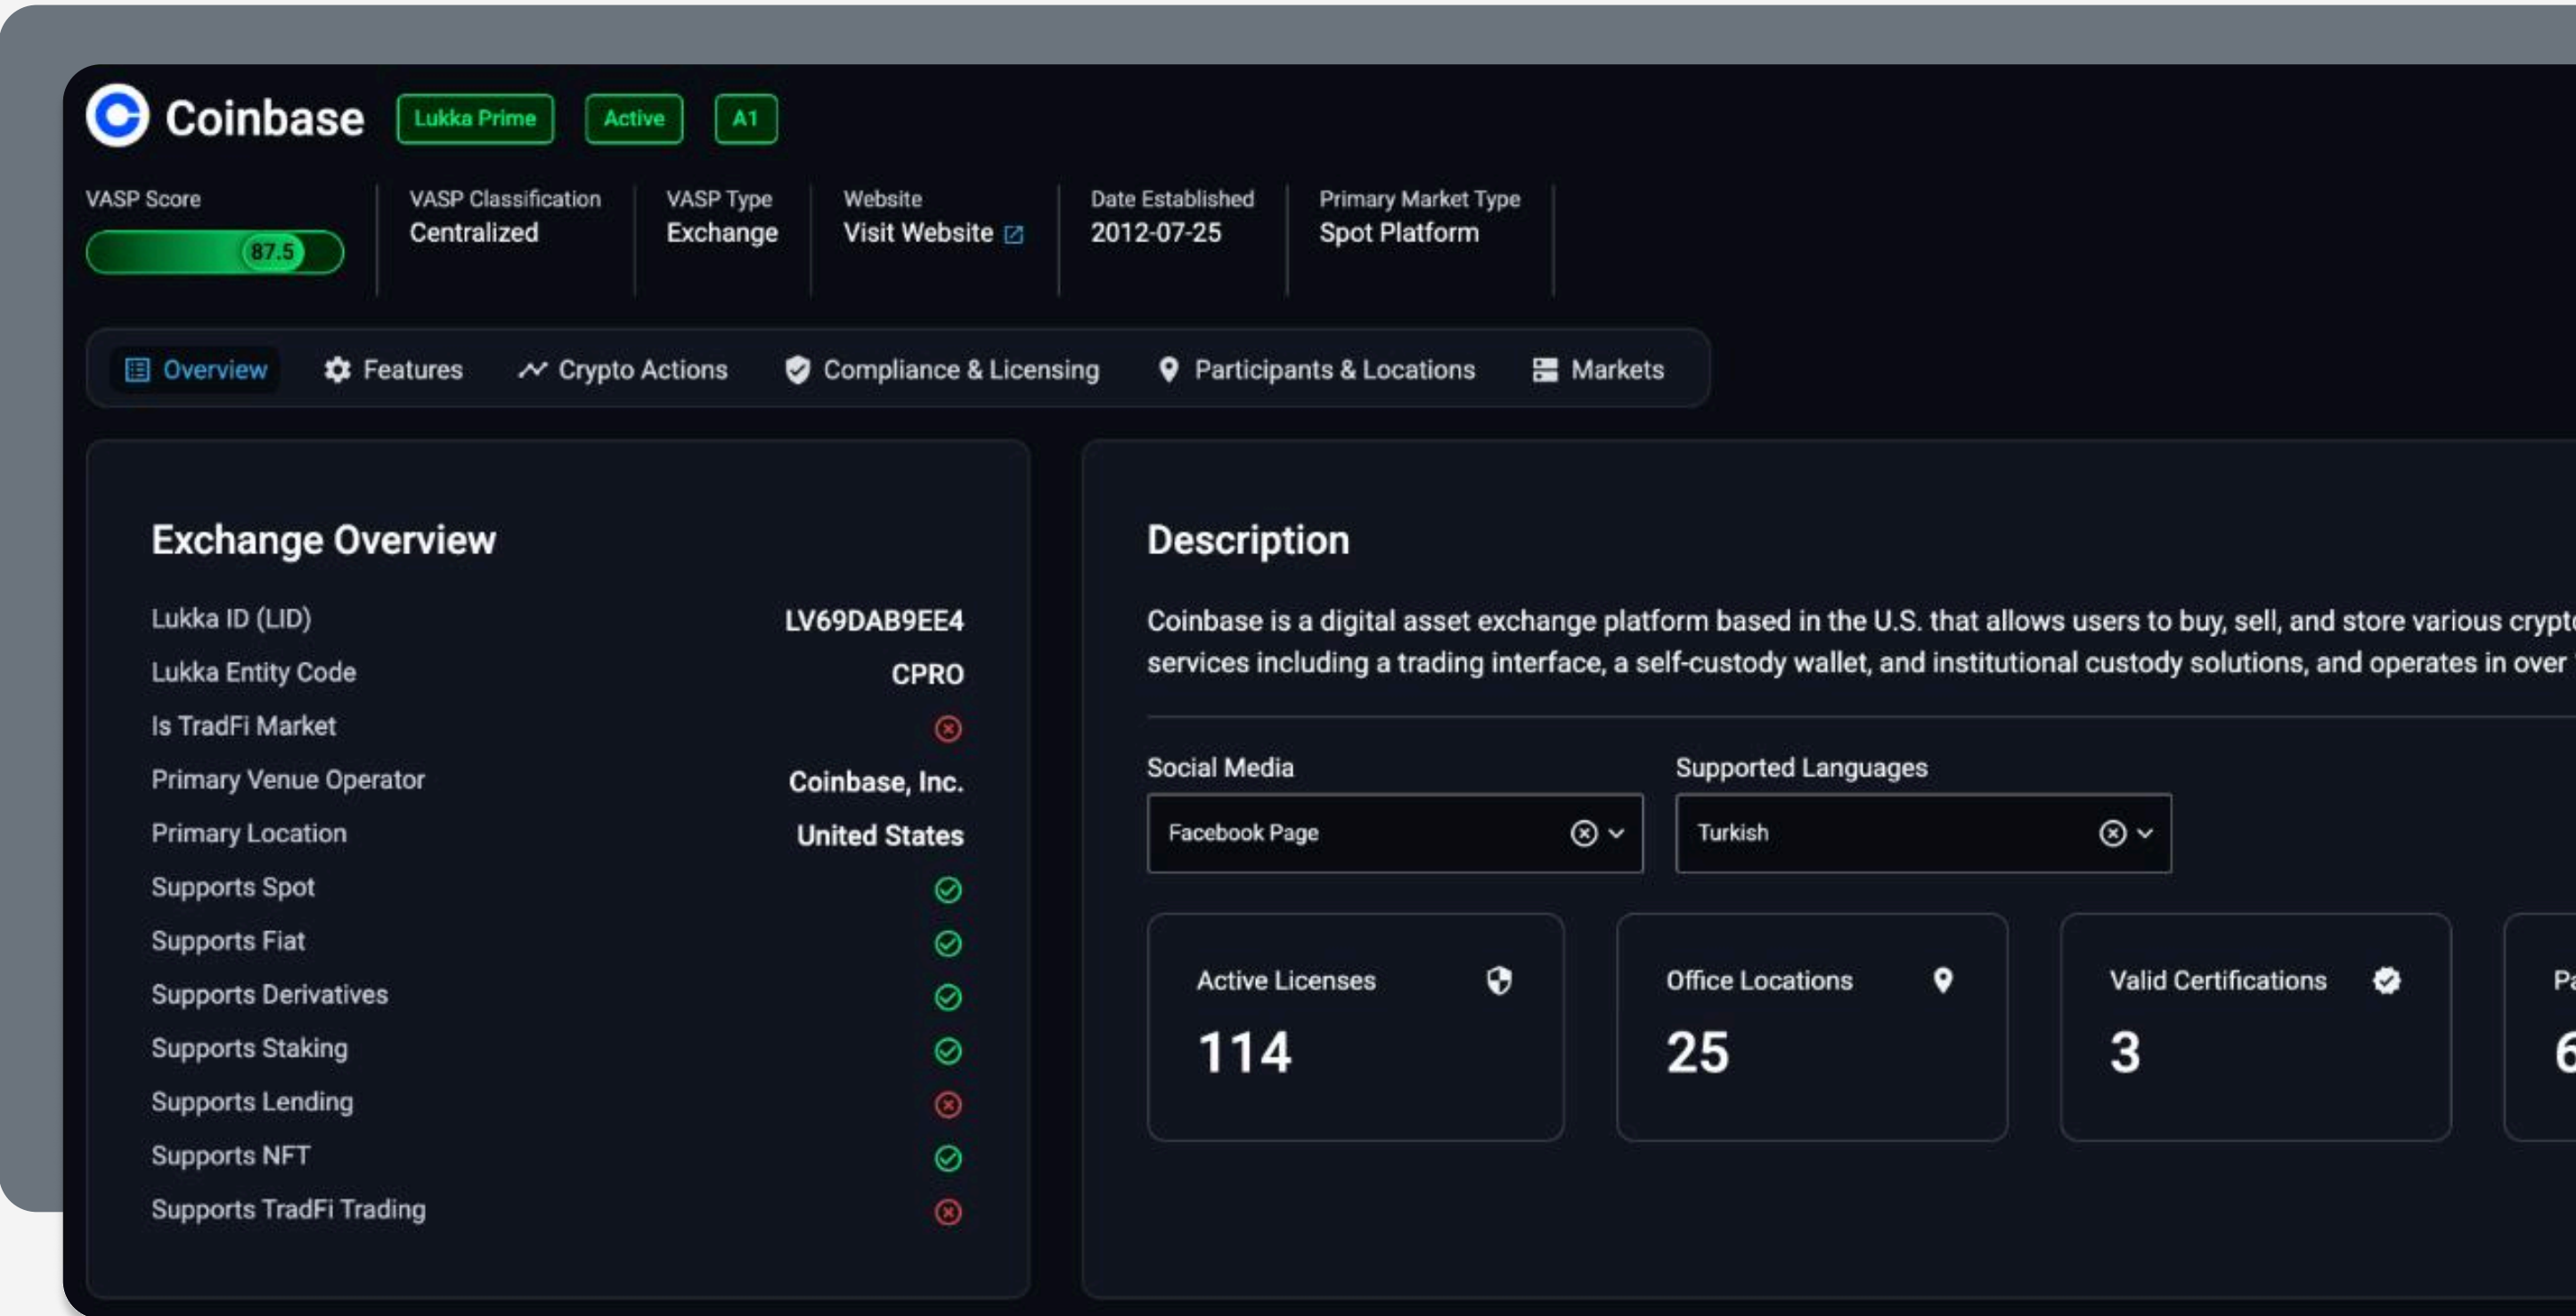

Support new asset approvals through standardized classifications, reference data, and operational intelligence.

Streamline Custody Operations

Reduce manual processes through normalized asset data, reconciliation support, and enterprise-grade workflows.

Support Emerging Asset Classes

Built to support tokenized securities, private credit, funds, stablecoins, RWAs, and future programmable assets.

Digital Asset Intelligence

Lukka Intelligence

Transform pricing, compliance, asset, and ecosystem data into actionable intelligence across custody operations.

Operational Oversight

Monitor counterparties, asset activity, market developments, and emerging risks through a unified intelligence platform.

AI-Ready Infrastructure

Deliver trusted intelligence into APIs, MCP-enabled workflows, copilots, agents, and enterprise systems to improve operational efficiency.

Digital Asset Data You Can Trust

All of Lukka’s products are created with institutional standards, such as AICPA Service and Organization Controls (SOC), which focus on data quality, financial calculation accuracy & completeness, and managing technology operational risk. Lukka has obtained AICPA SOC 1 Type II and SOC 2 Type II Audits, an ISO/IEC-27001 certification, NIST Cybersecurity Assessment, and continues to lead the industry with best in class technology risk governance.
