

The trusted data
operating system
for audit-ready
intelligence.

Digital assets, stablecoins, tokenized securities, and blockchain-based markets are rapidly becoming part of mainstream finance. Auditors must evaluate increasingly complex activity across on-chain and off-chain environments while maintaining the same standards of accuracy, independence, and defensibility expected in traditional markets. Lukka provides the trusted financial data, audit-ready controls, and institutional intelligence needed to validate digital asset activity with confidence and support assurance engagements across the evolving financial ecosystem.

Financial Truth & Valuation

OneFi — The Source of Financial Truth

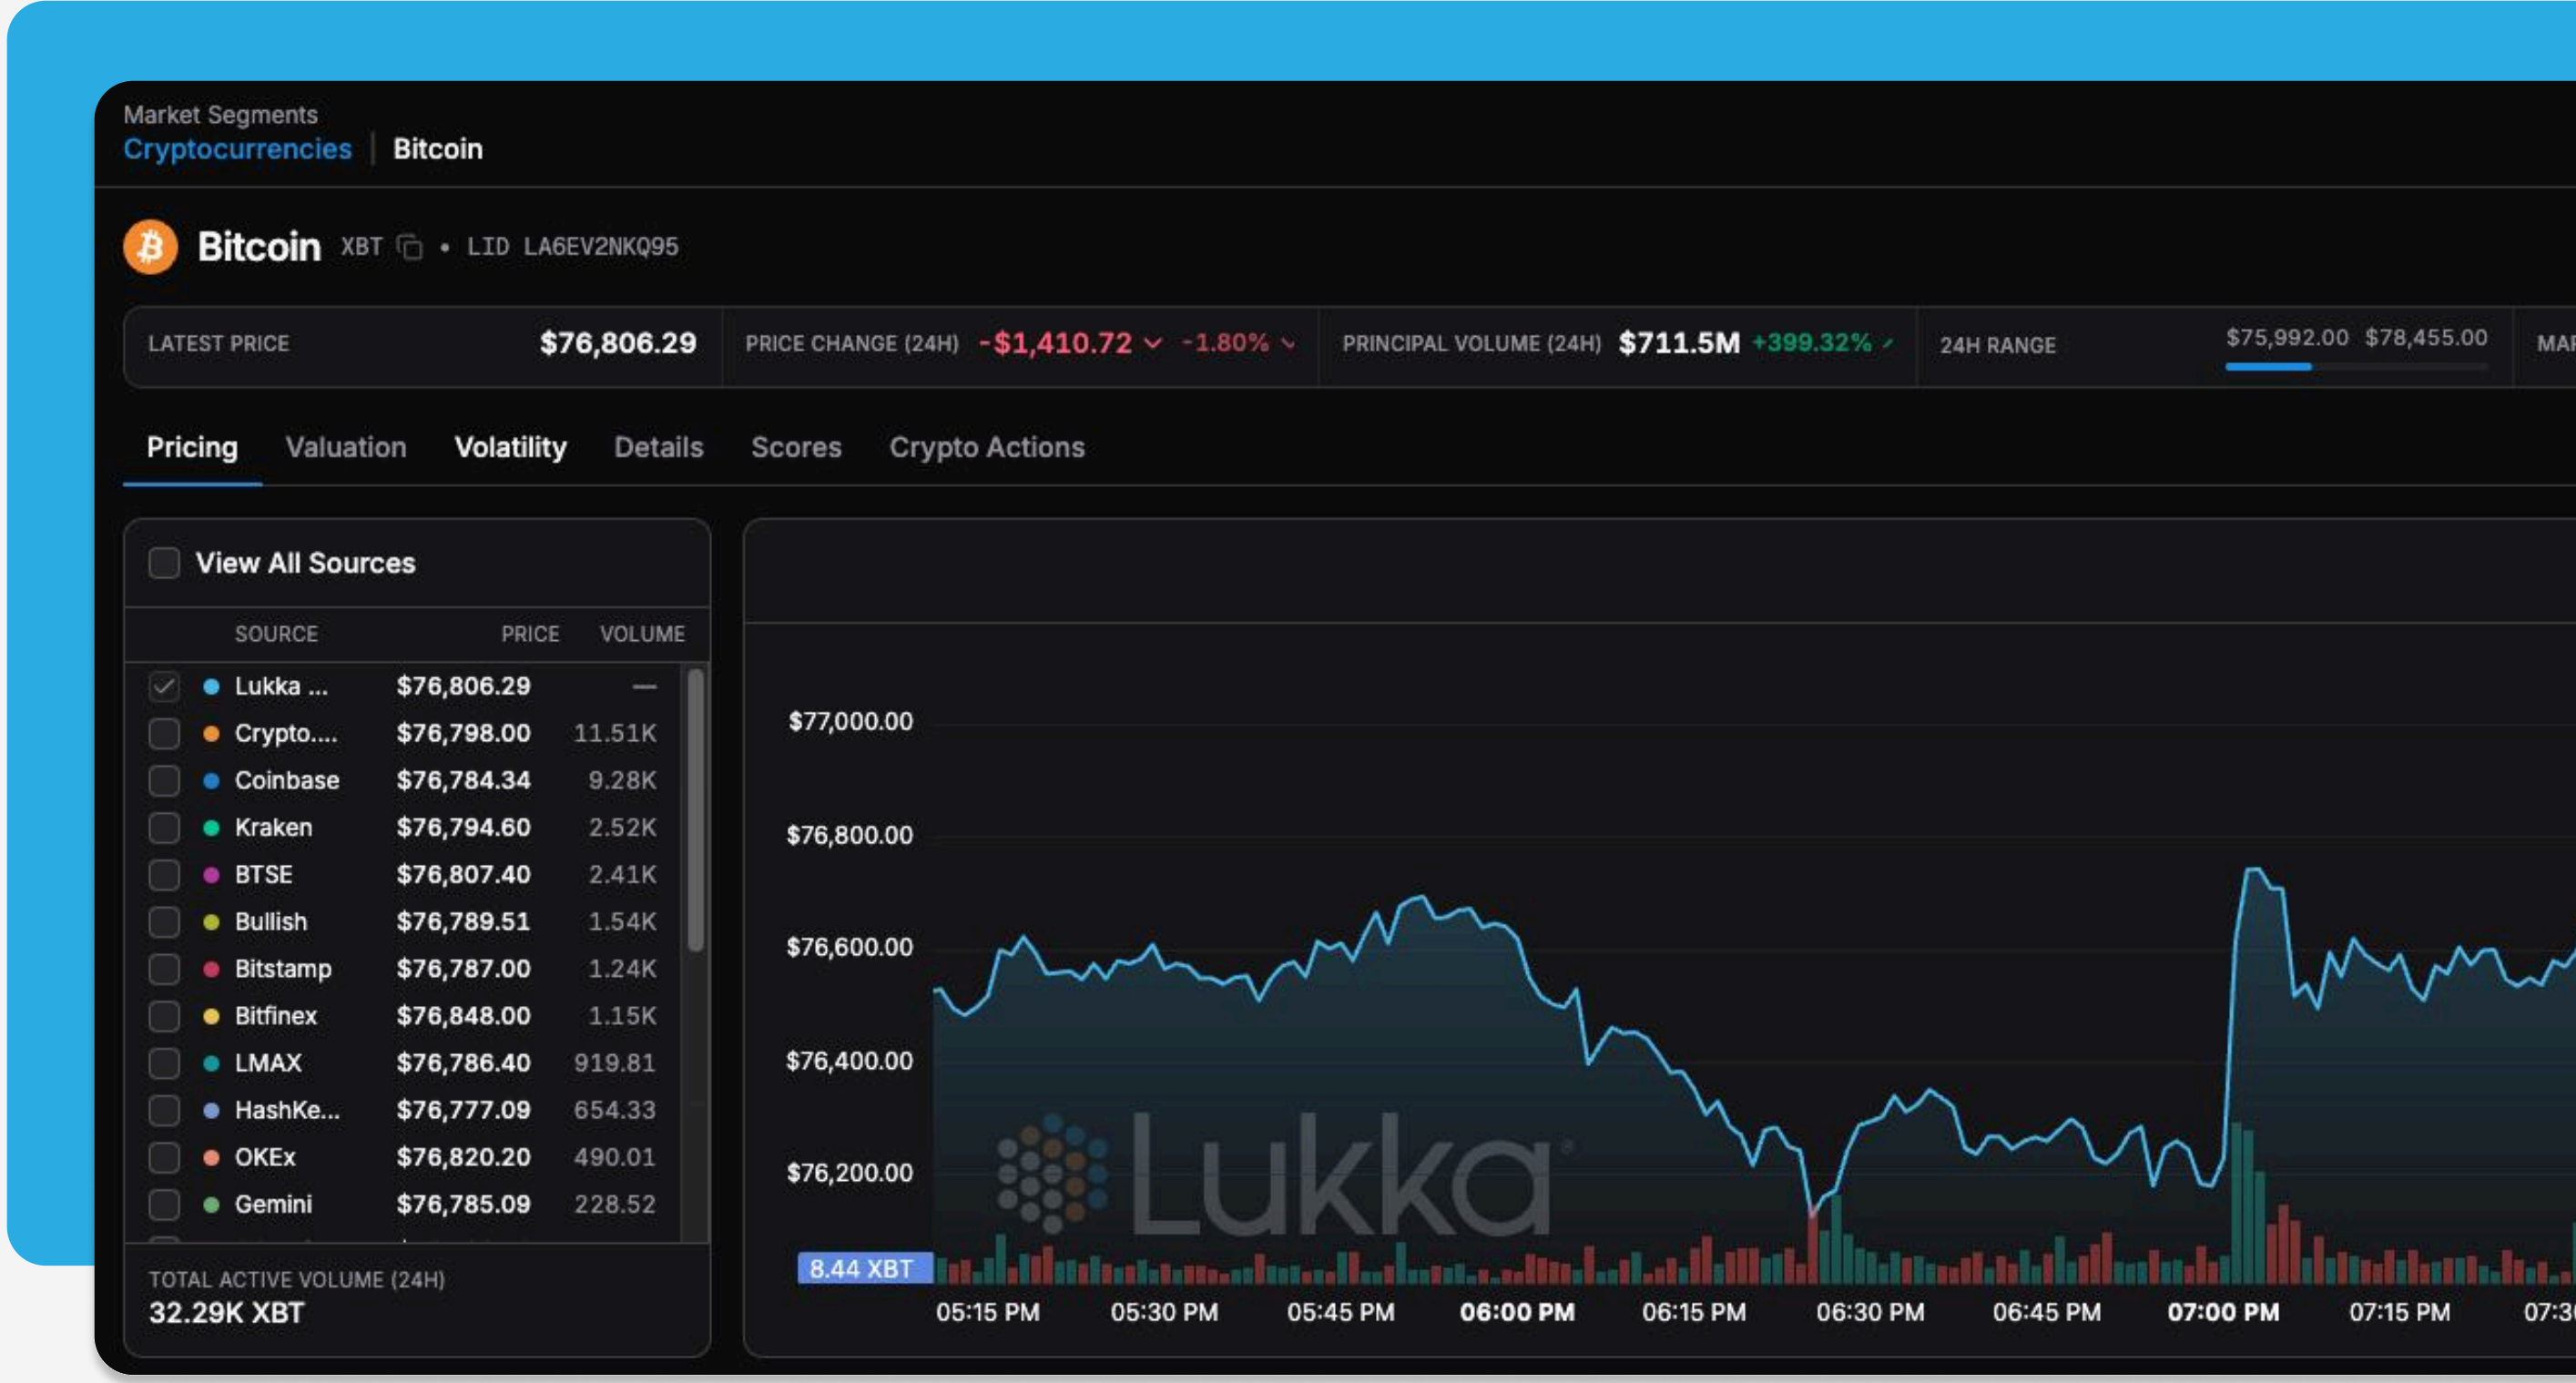

Transform fragmented blockchain, exchange, custody, and financial activity into a reconciled and auditable source of truth.

Institutional Pricing & Valuation

Deliver GAAP- and IFRS-aligned, audit-grade pricing methodologies across digital assets, tokenized securities, stablecoins, funds, derivatives, and emerging asset classes.

Defensible Valuation Frameworks

Support ASC 820 and IFRS 13 fair value measurement, financial reporting, impairment analysis, and audit procedures through transparent, independently governed methodologies.

Audit Trail & Data Integrity

Comprehensive Data Lineage

Maintain traceability from blockchain transactions through valuation, reporting, and financial statement preparation.

Standardized Asset Intelligence

Leverage intelligence across 2M+ assets, 108 blockchains, classifications, mappings, lifecycle events, and market relationships.

Audit-Ready Controls

Support assurance engagements with transparent methodologies, governance controls, and complete historical recordkeeping.

Risk, Compliance & Verification

VASPClear — The Source of Counterparty Trust

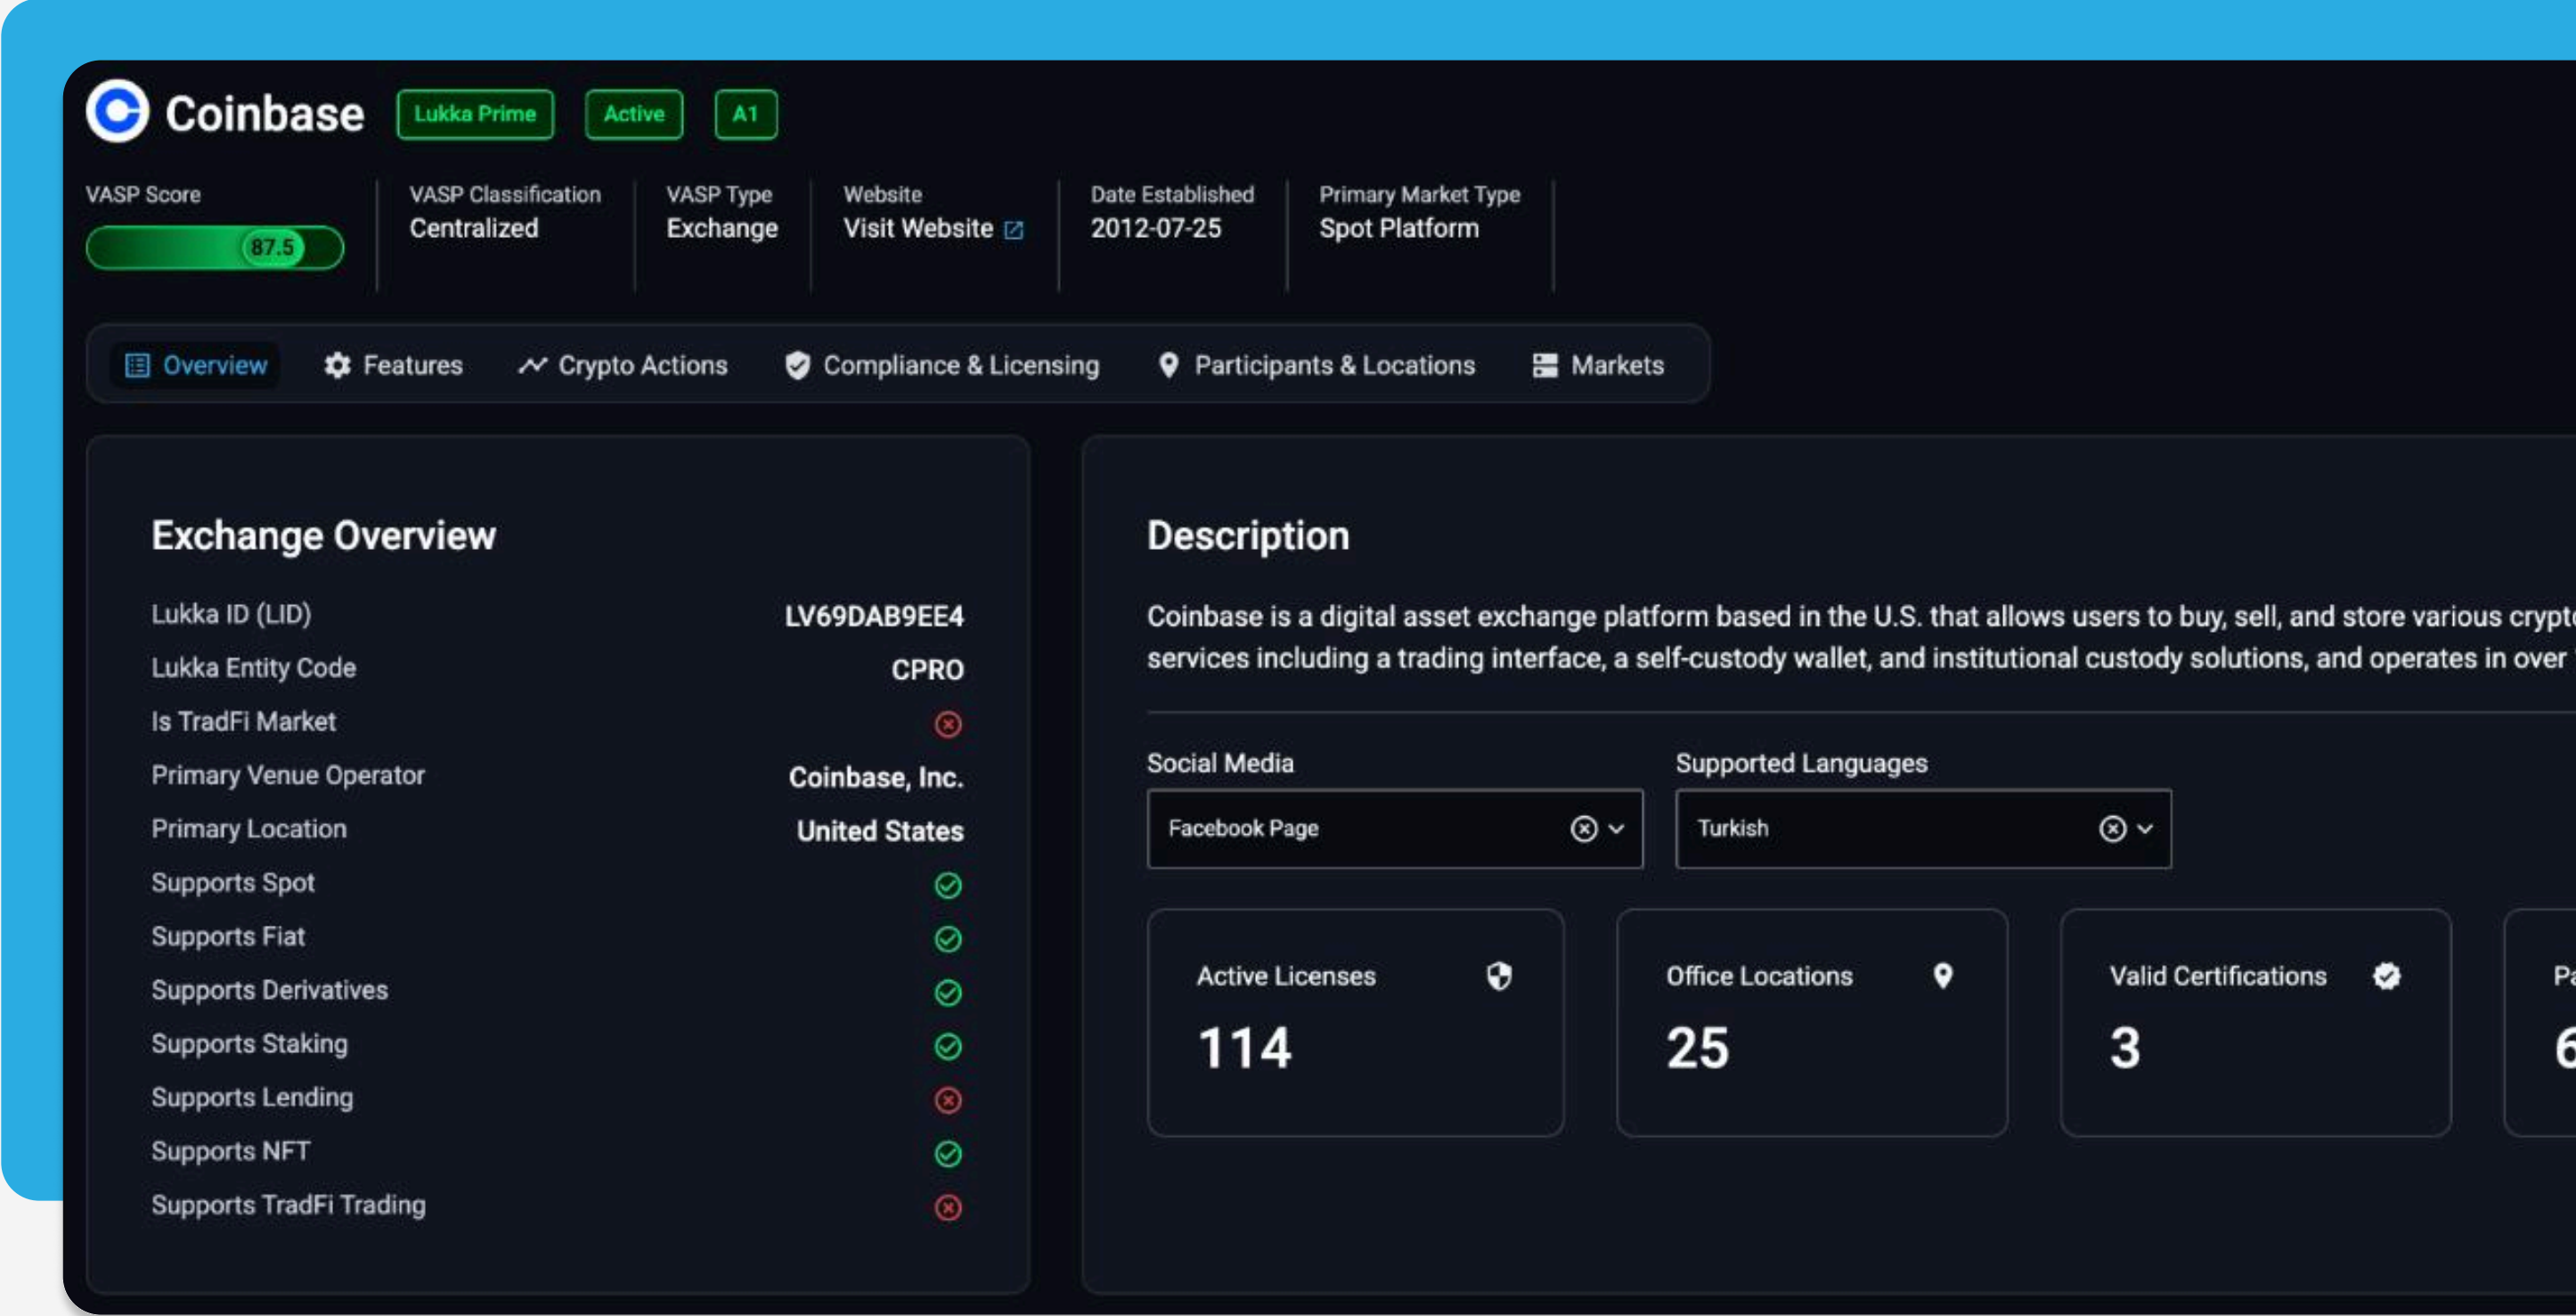

Provide visibility into exchanges, custodians, brokers, issuers, and digital asset ecosystem participants.

Counterparty Intelligence

Evaluate licensing, jurisdictional, ownership, and operational information to support audit procedures and risk assessments.

Regulatory & Compliance Validation

Strengthen AML, sanctions, governance, and regulatory testing through transparent and defensible intelligence infrastructure.

Assurance Intelligence

Lukka Intelligence

Transform pricing, compliance, blockchain, and ecosystem data into actionable intelligence for audit and advisory teams.

Analytical Review & Testing

Support substantive testing, risk assessments, trend analysis, and portfolio reviews through a unified intelligence platform.

AI-Ready Audit Workflows

Deliver trusted intelligence into APIs, MCP-enabled tools, copilots, agents, and next-generation audit technologies.

Digital Asset Data You Can Trust

All of Lukka's products are created with institutional standards, such as AICPA Service and Organization Controls (SOC), which focus on data quality, financial calculation accuracy & completeness, and managing technology operational risk. Lukka has obtained AICPA SOC 1 Type II and SOC 2 Type II Audits, an ISO/IEC-27001 certification, NIST Cybersecurity Assessment, and continues to lead the industry with best in class technology risk governance.
