

The most institutionally vetted solution on the market.

Digital asset ETFs are rapidly expanding beyond spot crypto into staking, tokenized assets, thematic baskets, and emerging investment products. Success requires trusted pricing, transparent benchmarks, operational resilience, and institutional-grade data infrastructure. Lukka provides the foundation ETF issuers need to launch products faster, deliver accurate NAVs, satisfy regulatory expectations, and scale into the future of programmable finance.

NAV & Valuation Infrastructure

OneFi — The Source of Financial Truth

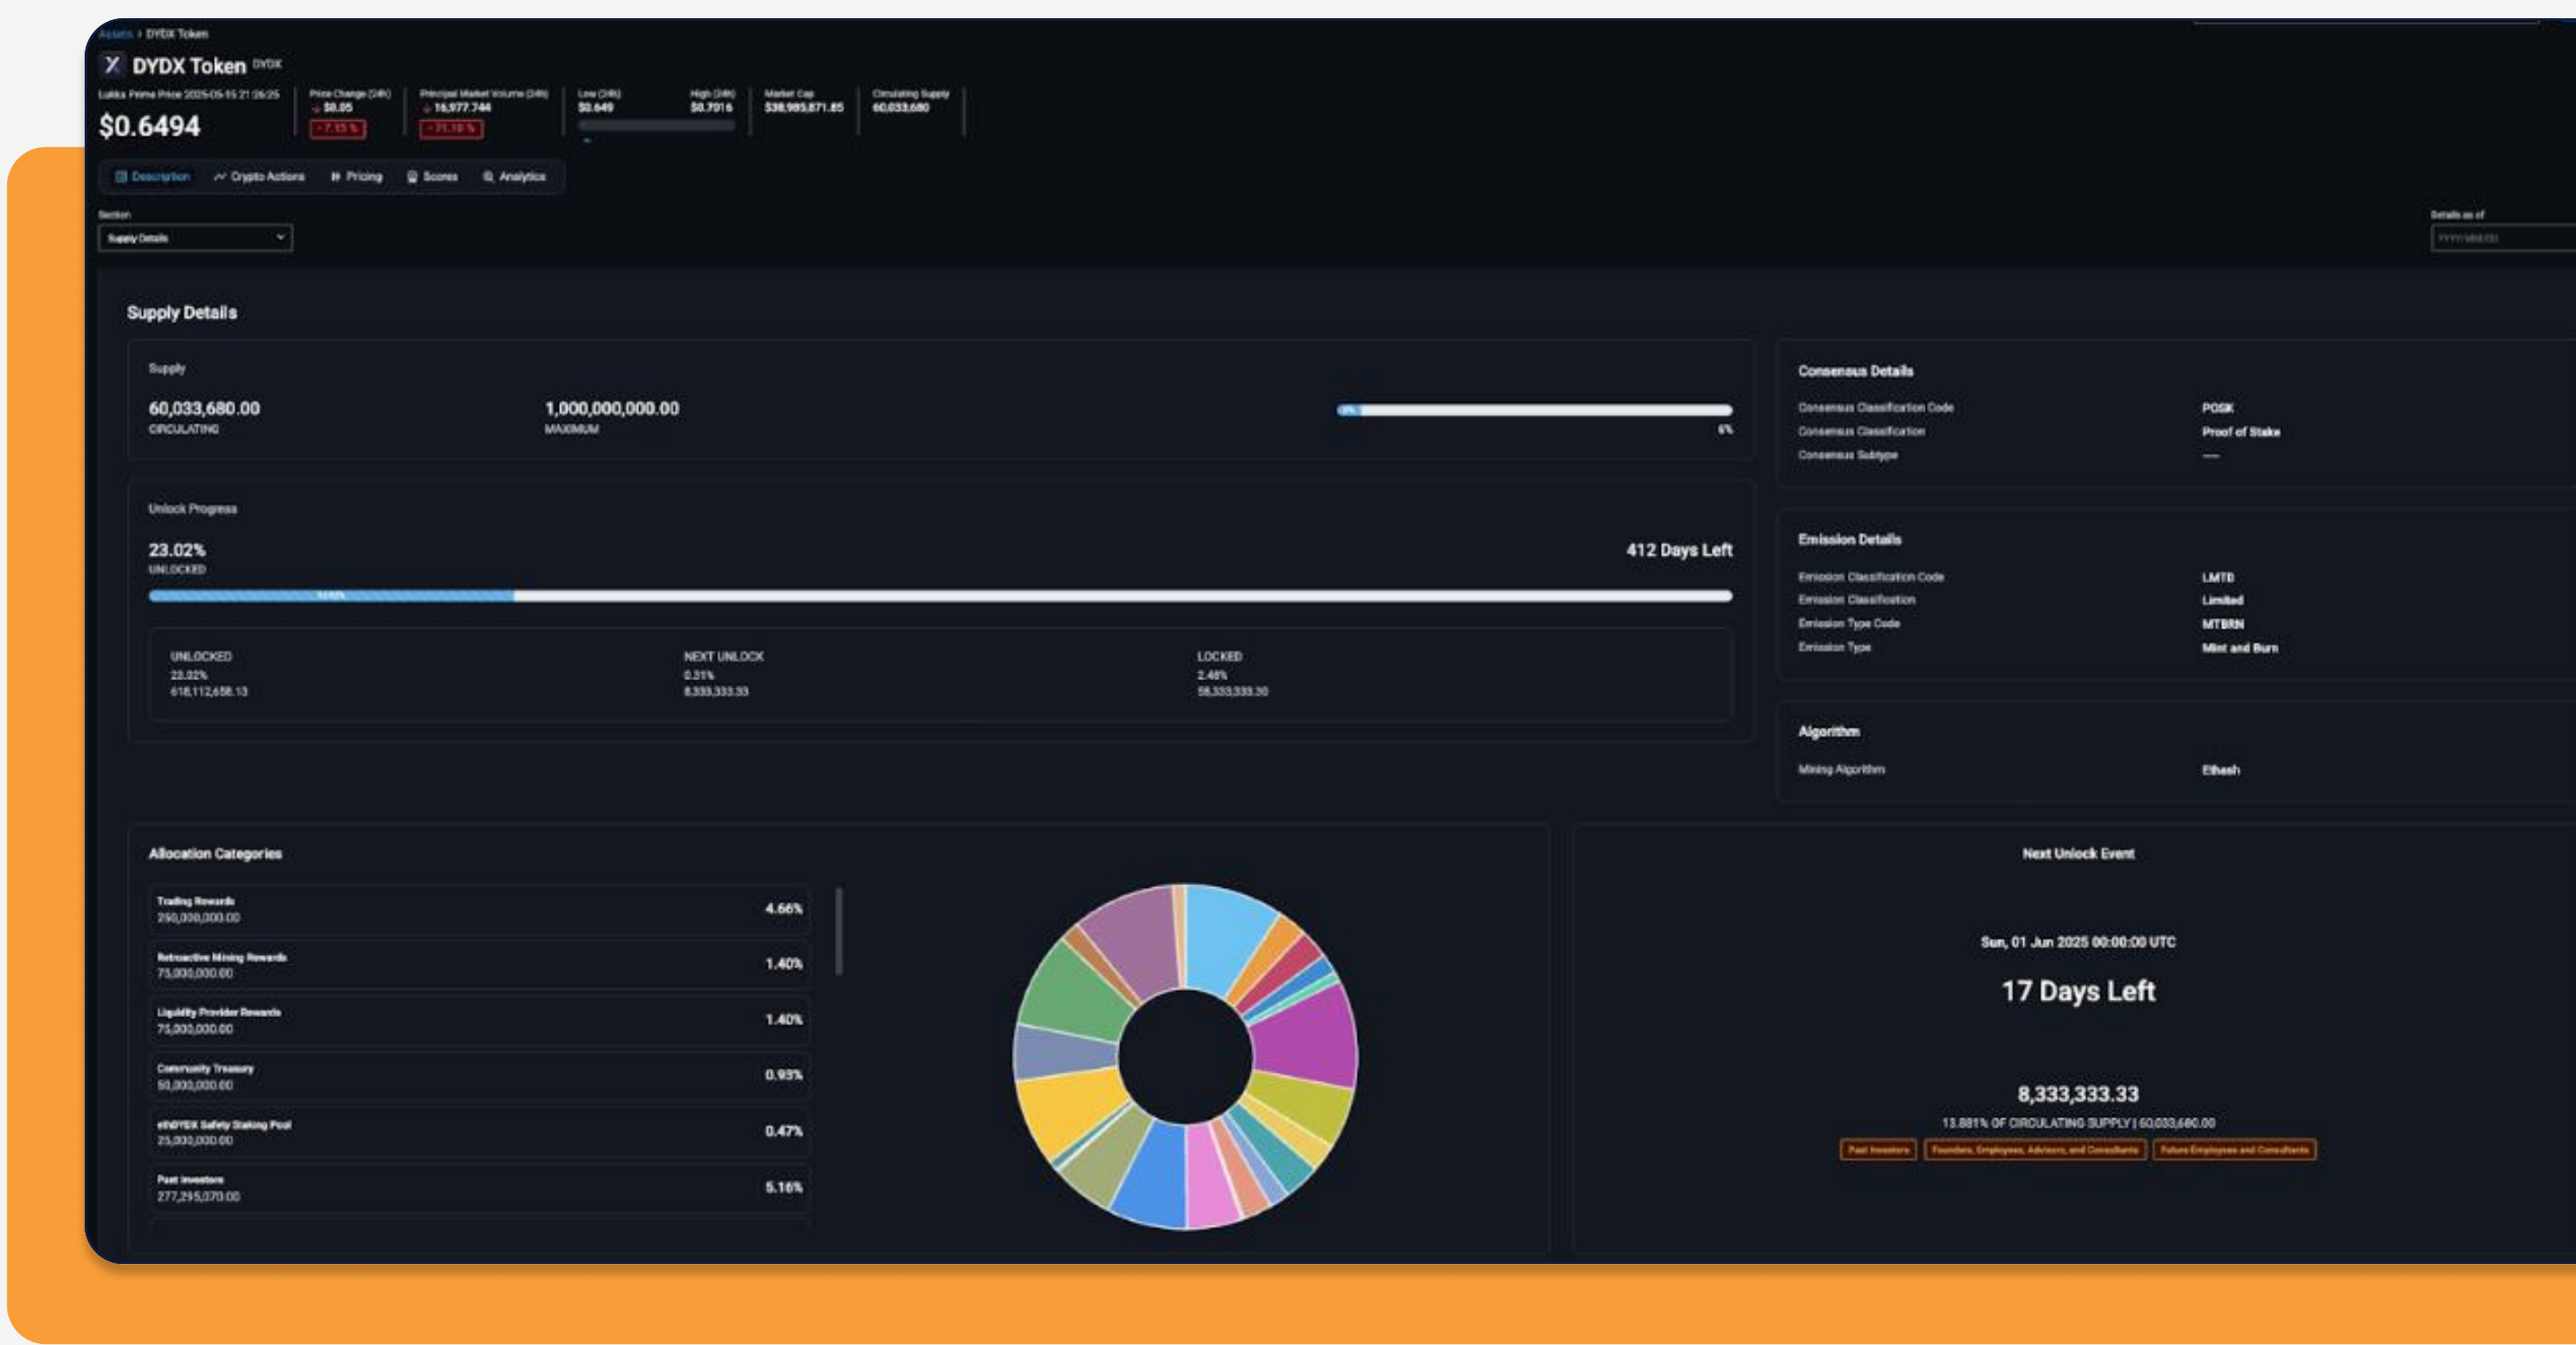

Transform fragmented blockchain, exchange, and custodian activity into a unified source of truth for valuation, accounting, reporting, and fund operations.

Institutional Pricing & Valuation

Fair Market Value pricing aligned with GAAP and IFRS methodologies across digital assets, derivatives, tokenized products, and emerging asset classes.

Audit-Ready NAV Production

Support daily NAV calculations, intraday valuation workflows, and investor reporting through transparent methodologies and complete data lineage

Benchmark & Product Innovation

Rules-Based Benchmarks

Power single-asset, multi-asset, thematic, and custom ETF strategies through transparent and institutional benchmark methodologies.

Index Construction & Licensing

Build differentiated investment products using trusted pricing, reference data, classifications, and asset intelligence.

Future-Ready Product Infrastructure

Support staking-enabled products, tokenized assets, prediction markets, and evolving digital asset investment strategies as markets continue to mature.

Counterparty Trust & Compliance

VASPClear — The Source of Counterparty Trust

Establish trusted relationships across custodians, liquidity providers, exchanges, authorized participants, and ecosystem partners.

VASP Intelligence & Risk Monitoring

Evaluate counterparties through licensing, jurisdictional, ownership, and operational intelligence to support governance and oversight

Regulatory & Reputational Protection

Support AML, sanctions, compliance, audit, and regulatory workflows through transparent and defensible institutional data infrastructure.

Investment Intelligence

Lukka Intelligence

Transform pricing, reference, compliance, and market data into actionable intelligence across ETF operations and product development.

Market Discovery & Product Research

Identify emerging assets, market trends, sector exposures, and new investment opportunities through a unified intelligence platform.

AI-Ready Workflows

Extend intelligence into APIs, dashboards, MCP-enabled tools, copilots, and investment research workflows.

Digital Asset Data You Can Trust

All of Lukka’s products are created with institutional standards, such as AICPA Service and Organization Controls (SOC), which focus on data quality, financial calculation accuracy & completeness, and managing technology operational risk. Lukka has obtained AICPA SOC 1 Type II and SOC 2 Type II Audits, an ISO/IEC-27001 certification, NIST Cybersecurity Assessment, and continues to lead the industry with best in class technology risk governance.
