

The most institutionally vetted solution on the market.

Digital asset markets operate 24/7 across fragmented venues, evolving asset classes, and rapidly changing liquidity conditions. High-frequency trading firms require more than market data—they need trusted intelligence, comprehensive coverage, and infrastructure capable of supporting sophisticated trading strategies at scale. Lukka transforms exchange, blockchain, and ecosystem activity into institutional-grade intelligence that helps firms identify opportunities faster, manage risk more effectively, and operate with confidence across global digital asset markets.

Market Data & Asset Intelligence

OneFi — The Source of Financial Truth

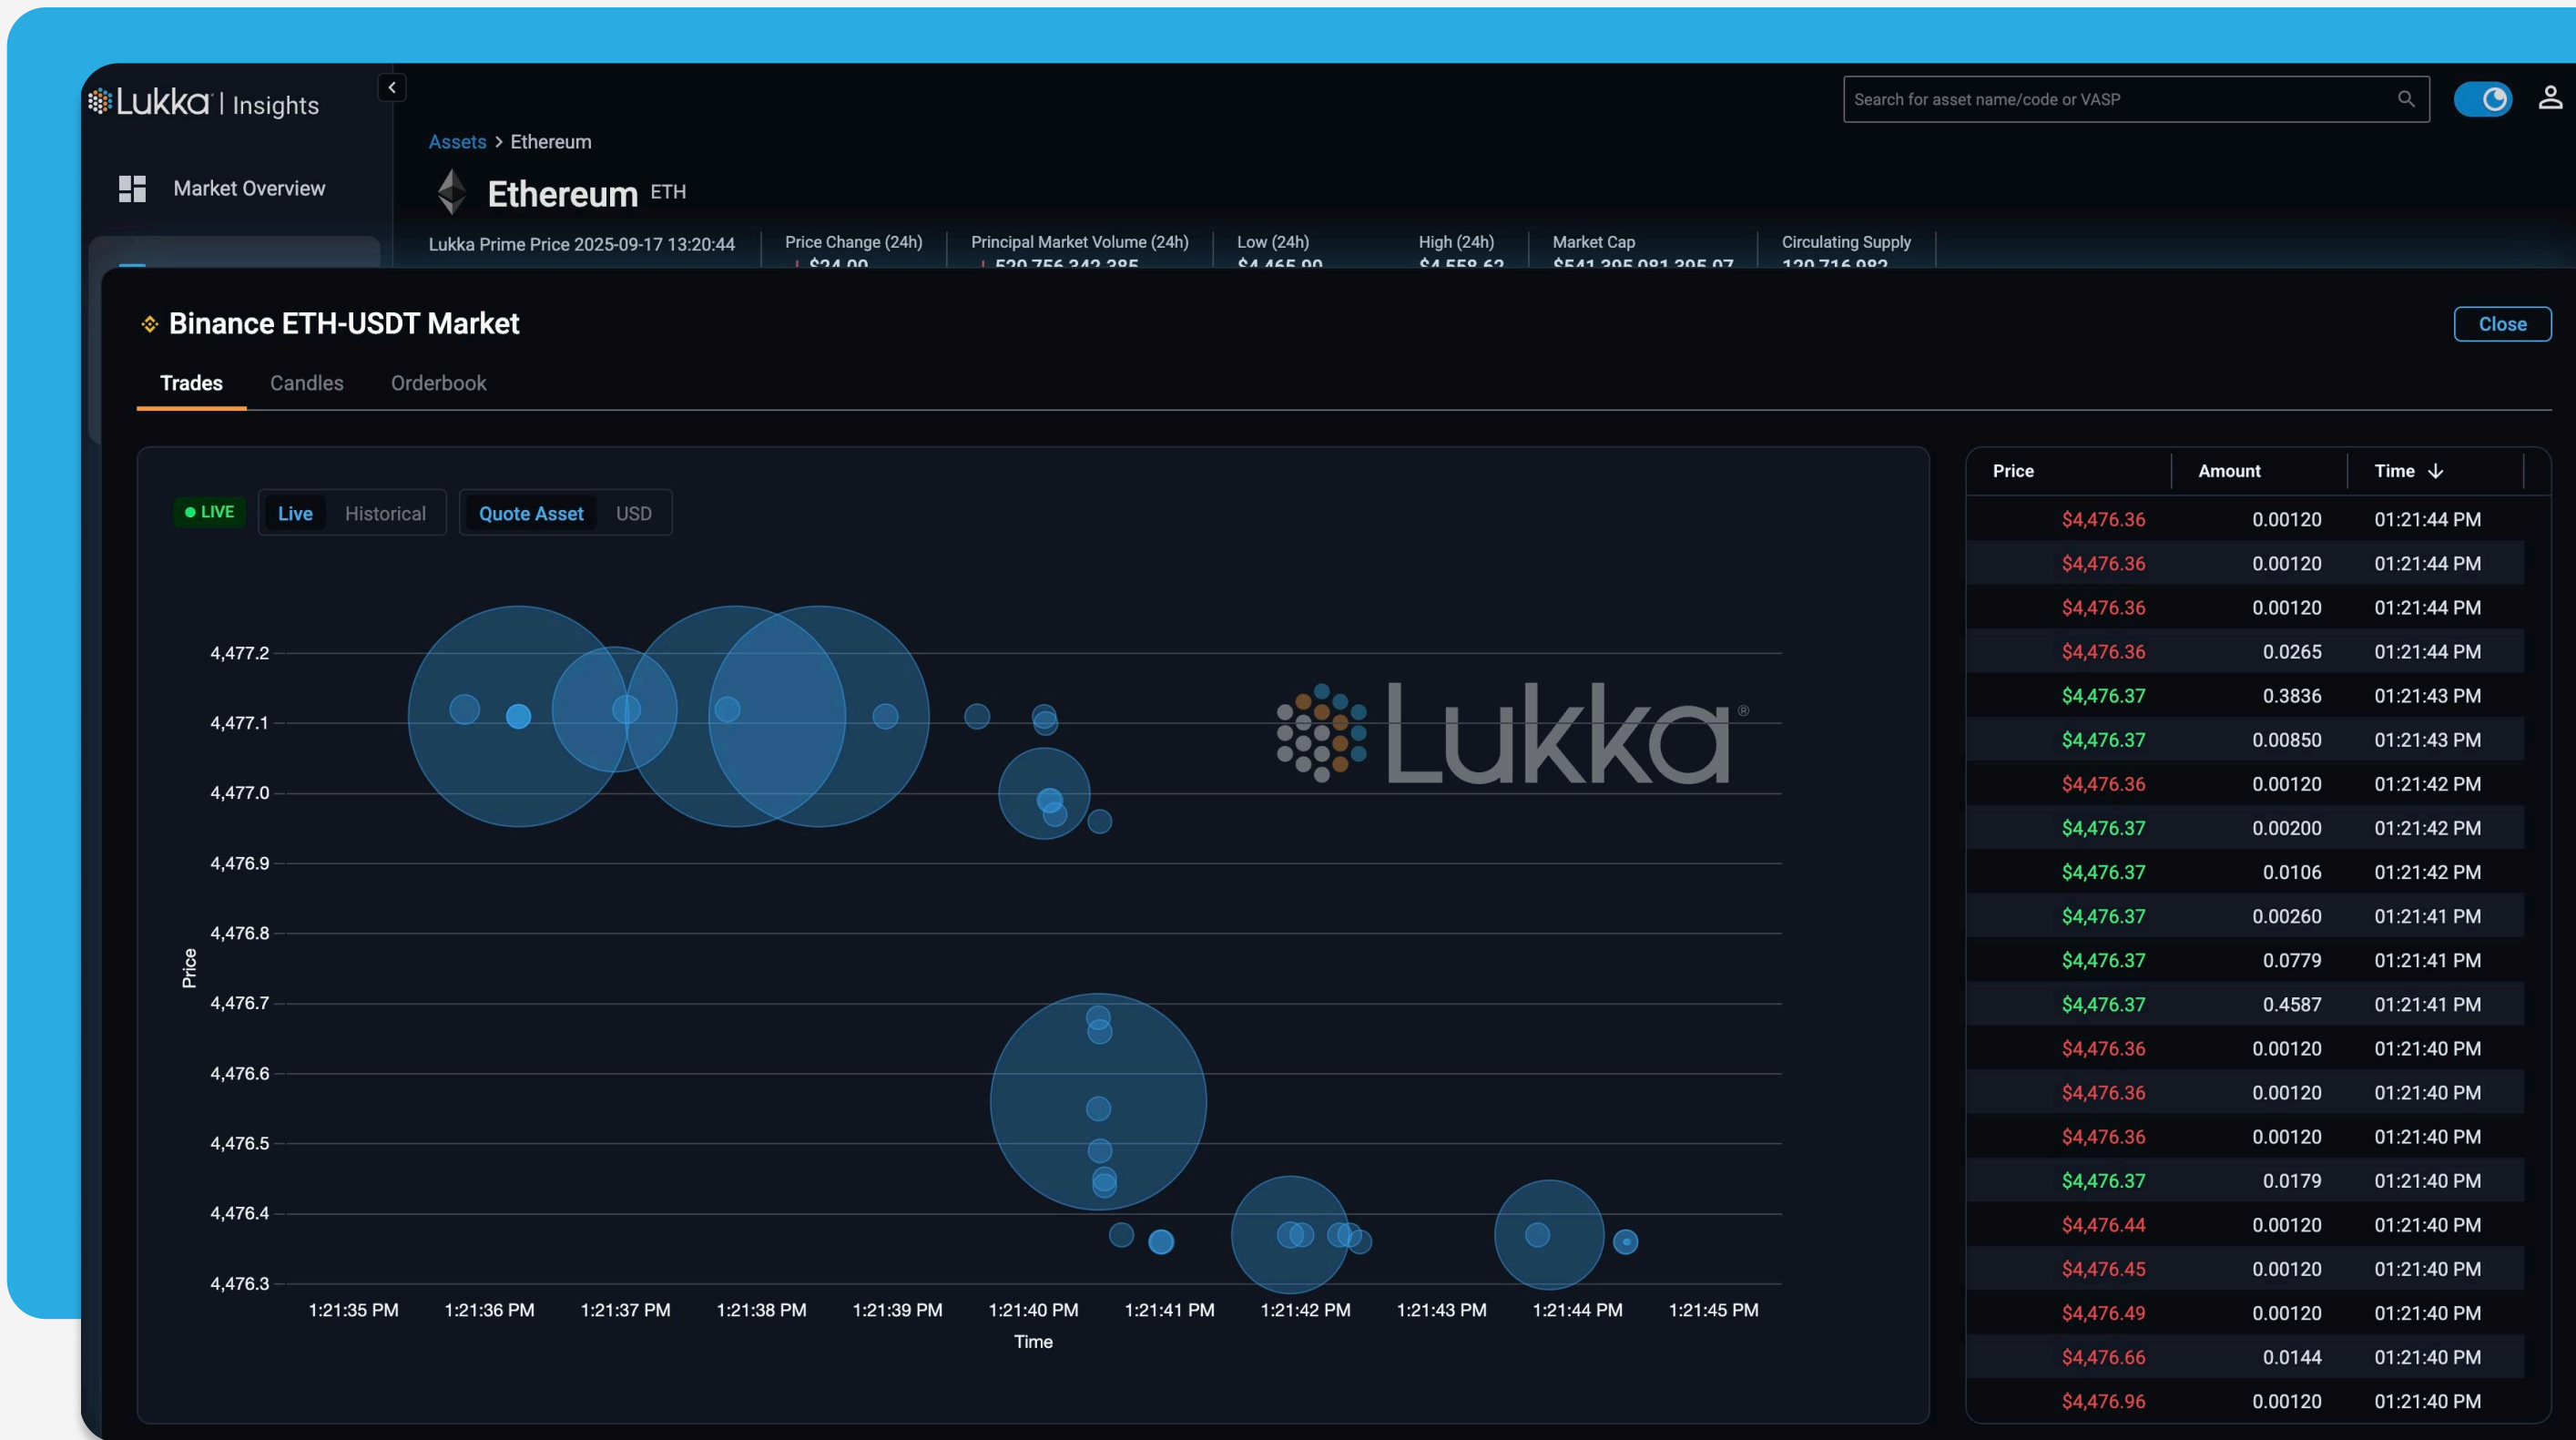

Normalize activity across exchanges, OTC markets, blockchain networks, and digital asset ecosystems through a unified data foundation.

Comprehensive Market Coverage

Access institutional-grade intelligence across 2M+ assets, 108 blockchains, trading venues, tokenized assets, derivatives, and emerging market structures.

Asset & Lifecycle Intelligence

Monitor listings, delistings, forks, migrations, rebrands, token actions, and ecosystem events that influence trading decisions and market dynamics.

Trading Intelligence & Execution

Market Discovery

Identify emerging assets, liquidity opportunities, sector trends, and market developments through standardized classifications and asset intelligence.

Faster Decision Making

Transform fragmented market activity into actionable insights that support trading, strategy development, and execution workflows.

Institutional Data Delivery

Consume intelligence through APIs, feeds, enterprise integrations, and real-time workflows designed for institutional trading environments.

Risk & Counterparty Intelligence

VASPClear — The Source of Counterparty Trust

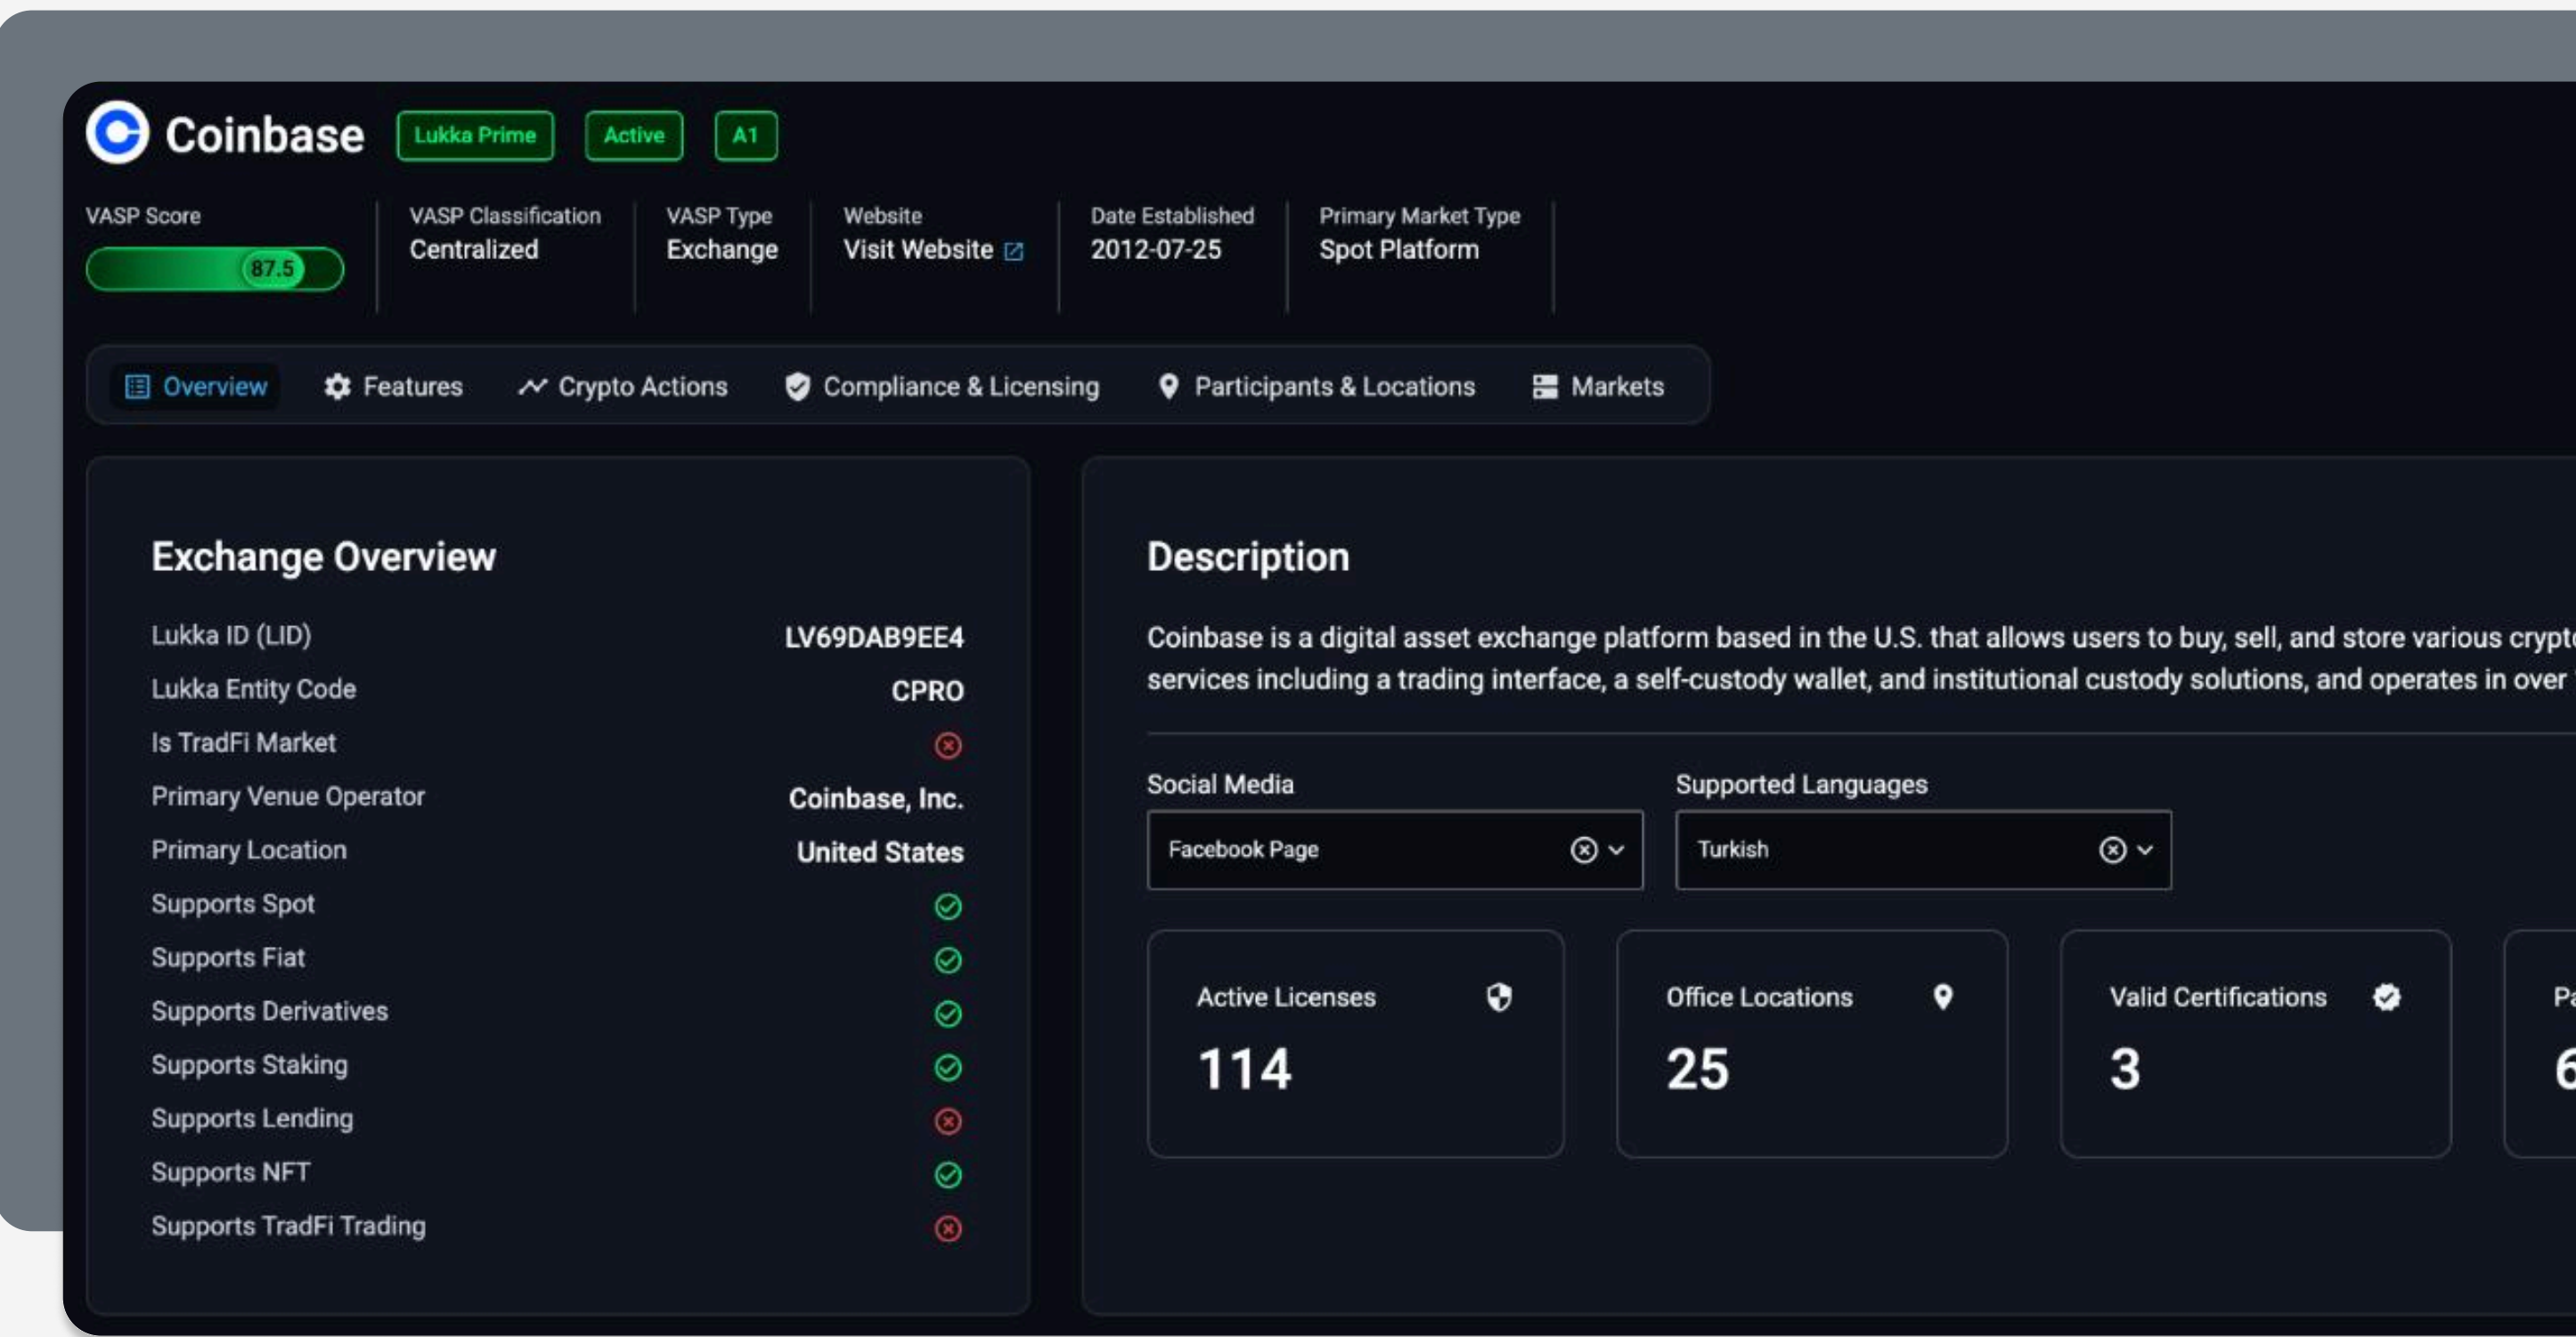

Establish visibility across exchanges, brokers, custodians, market makers, liquidity providers, and digital asset counterparties.

Counterparty Intelligence

Evaluate licensing, jurisdictional, ownership, operational, and risk information across digital asset market participants.

Operational Risk Management

Reduce exposure to fragmented data, evolving counterparties, and changing market structures through trusted institutional intelligence.

Quantitative & AI-Driven Intelligence

Lukka Intelligence

Transform pricing, reference, compliance, blockchain, and ecosystem data into actionable intelligence for trading and research teams.

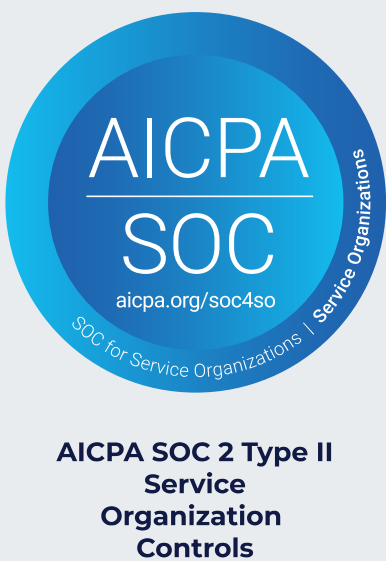

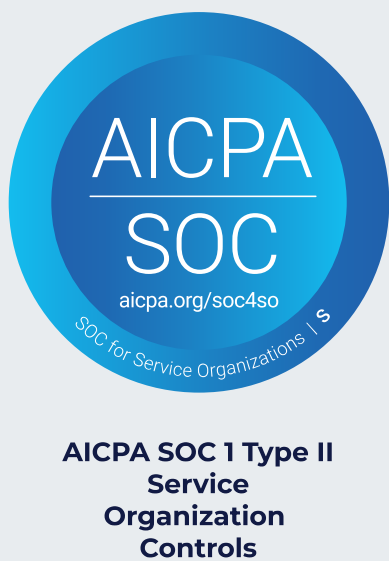

Research & Signal Development

Support quantitative analysis, market research, asset discovery, and opportunity identification through a unified intelligence platform.

AI-Ready Workflows

Deliver intelligence through APIs, MCP-enabled tools, copilots, agents, and next-generation quantitative research environments.

Digital Asset Data You Can Trust

All of Lukka's products are created with institutional standards, such as AICPA Service and Organization Controls (SOC), which focus on data quality, financial calculation accuracy & completeness, and managing technology operational risk. Lukka has obtained AICPA SOC 1 Type II and SOC 2 Type II Audits, an ISO/IEC-27001 certification, NIST Cybersecurity Assessment, and continues to lead the industry with best in class technology risk governance.
