

The data operating system behind compliant and auditable digital currencies.

Stablecoins are becoming foundational infrastructure for payments, settlement, capital markets, treasury management, and global value transfer. As adoption accelerates across financial institutions, enterprises, and digital asset ecosystems, issuers need trusted financial data, transparent reserves, compliant counterparties, and scalable infrastructure. Lukka provides the institutional foundation that helps stablecoin issuers build trust, demonstrate transparency, satisfy regulatory requirements, and support the next generation of digital financial services.

Market Data & Asset Intelligence

OneFi — The Source of Financial Truth

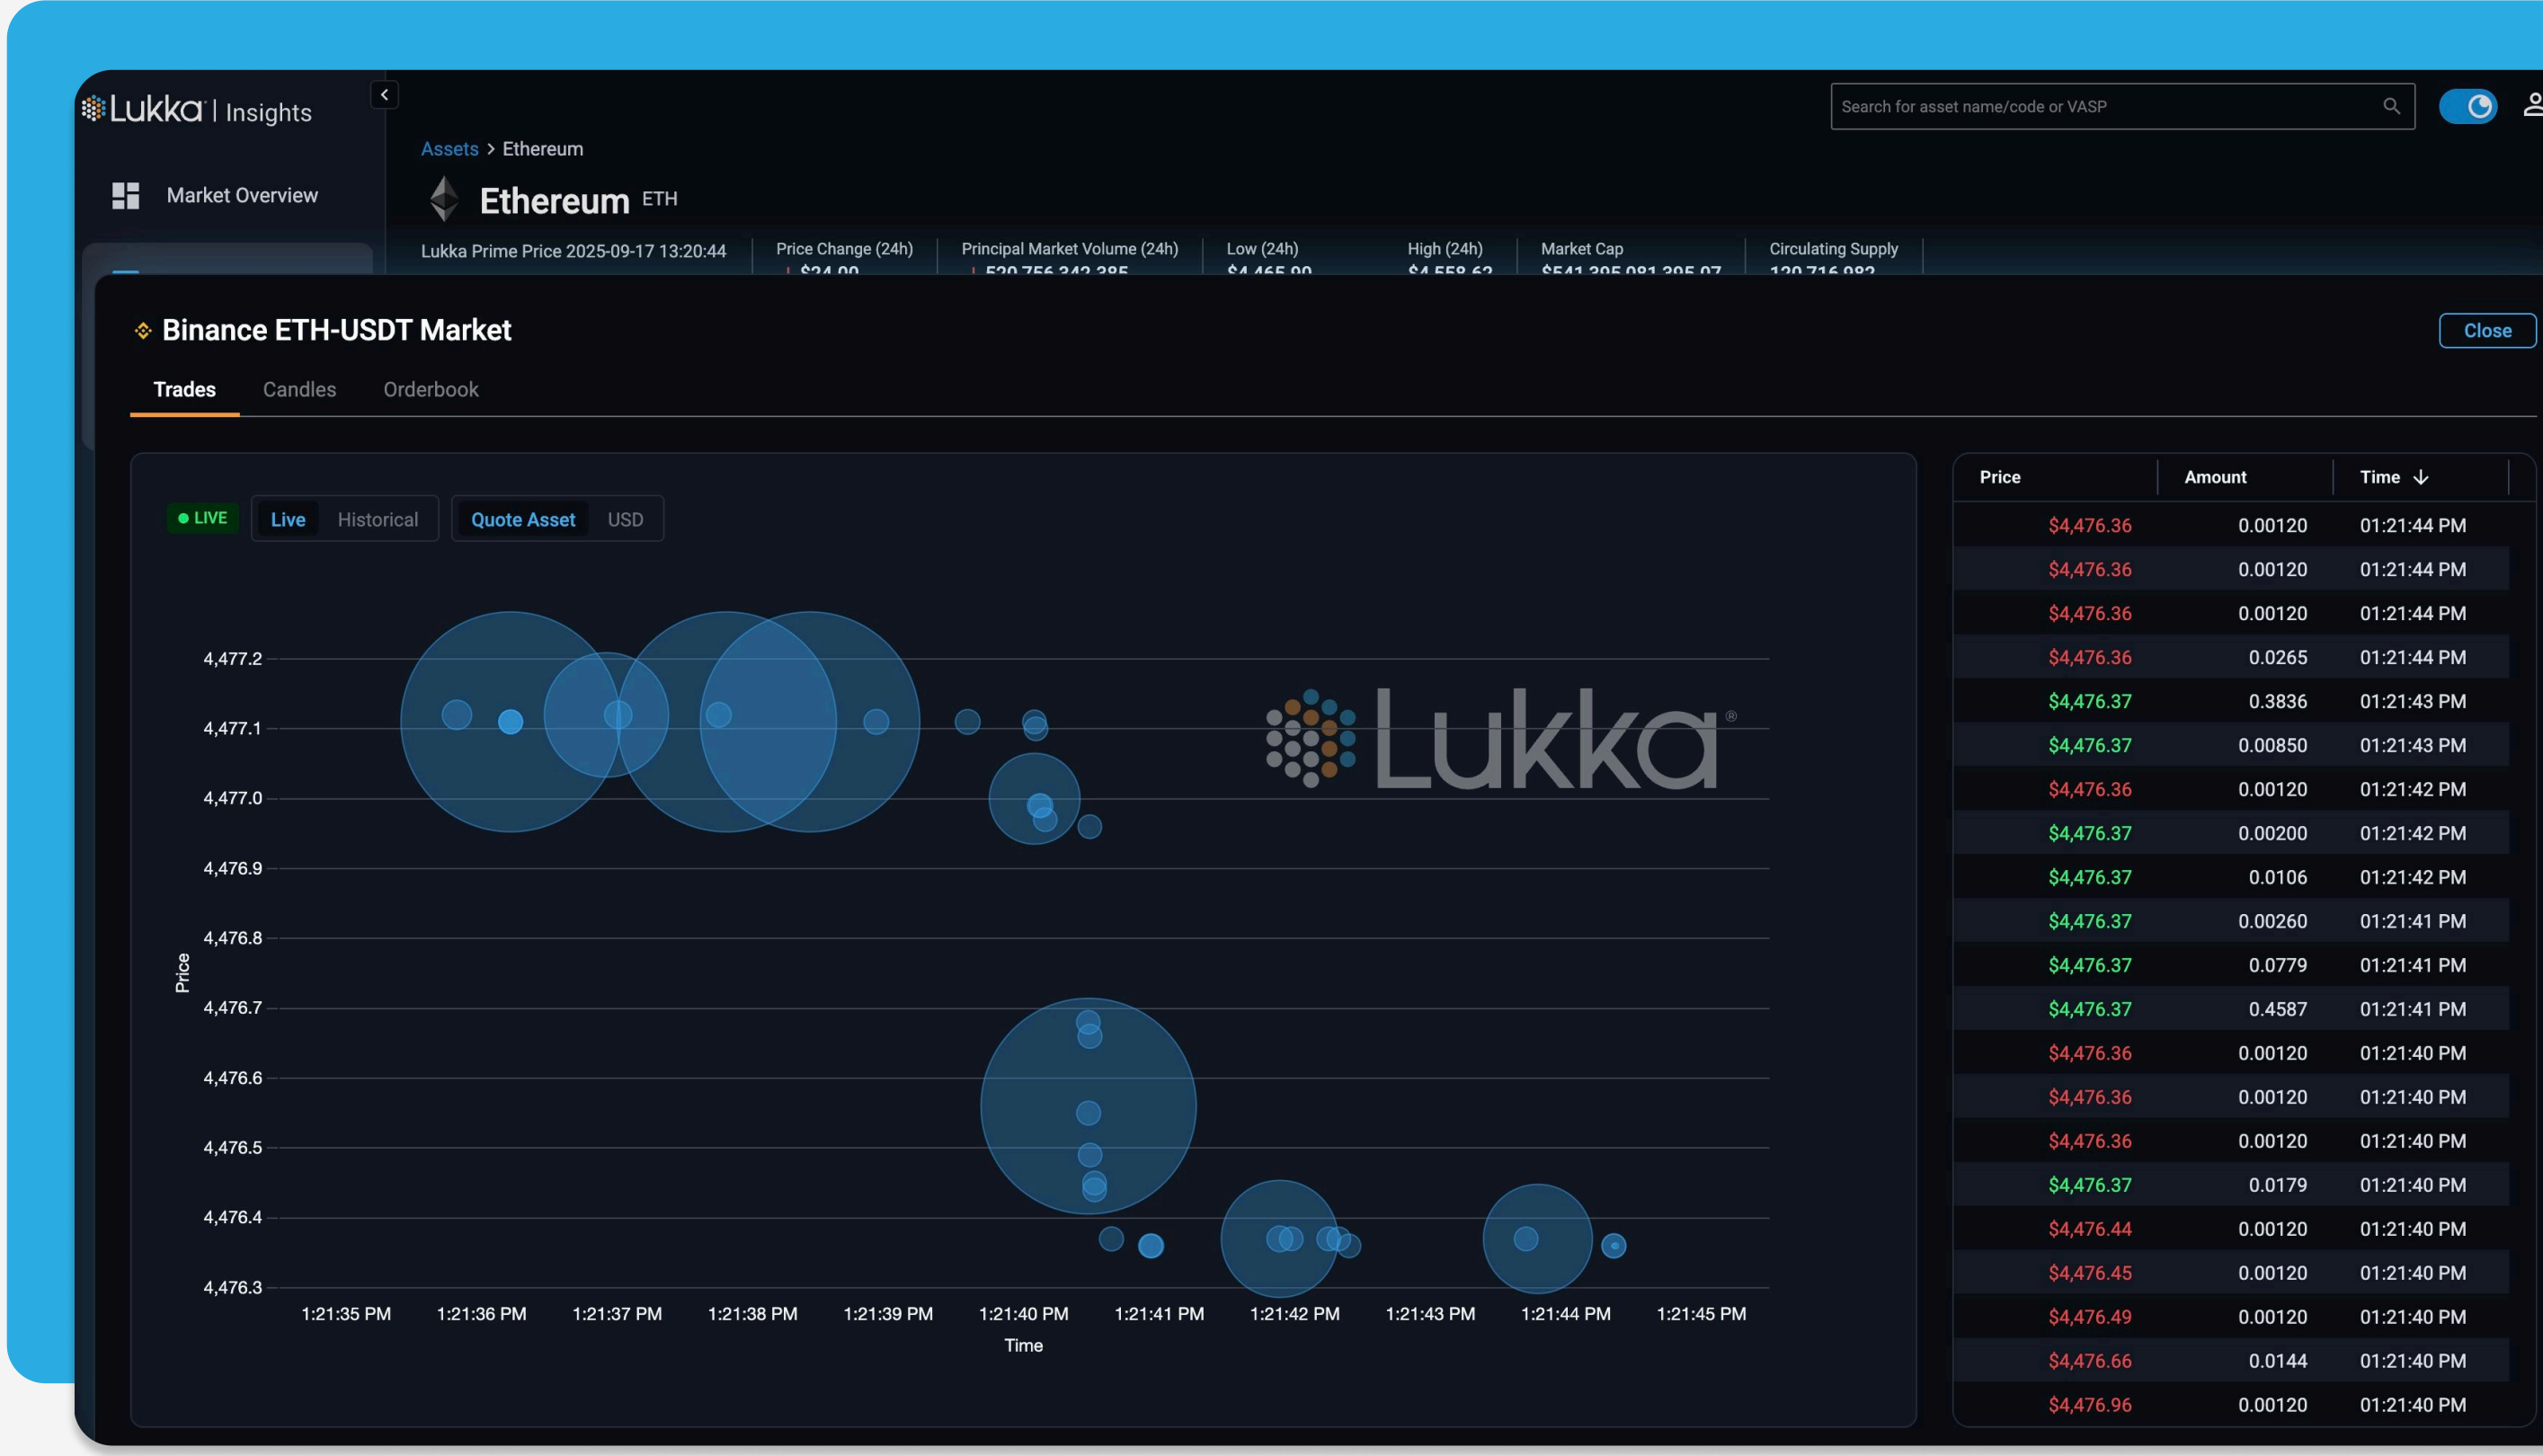

Create a unified source of truth across reserve assets, token issuance, financial systems, and blockchain activity.

Institutional Pricing & Valuation

Deliver audit-grade pricing and valuation methodologies.

Reserve Transparency

Support attestations, reporting, reserve monitoring, and collateral oversight through transparent and defensible financial data.

Stablecoin Infrastructure

Connect Traditional & Digital Finance

Bridge banking systems, custodians, exchanges, payment providers, and blockchain networks through standardized institutional data.

Support Real-Time Settlement

Enable trusted financial infrastructure for payments, treasury operations, capital markets activity, and digital asset transactions.

Built for the Future of Finance

Support stablecoins, tokenized deposits, settlement assets, programmable money, and emerging digital financial products.

Trust, Risk & Compliance

VASPClear — The Source of Counterparty Trust

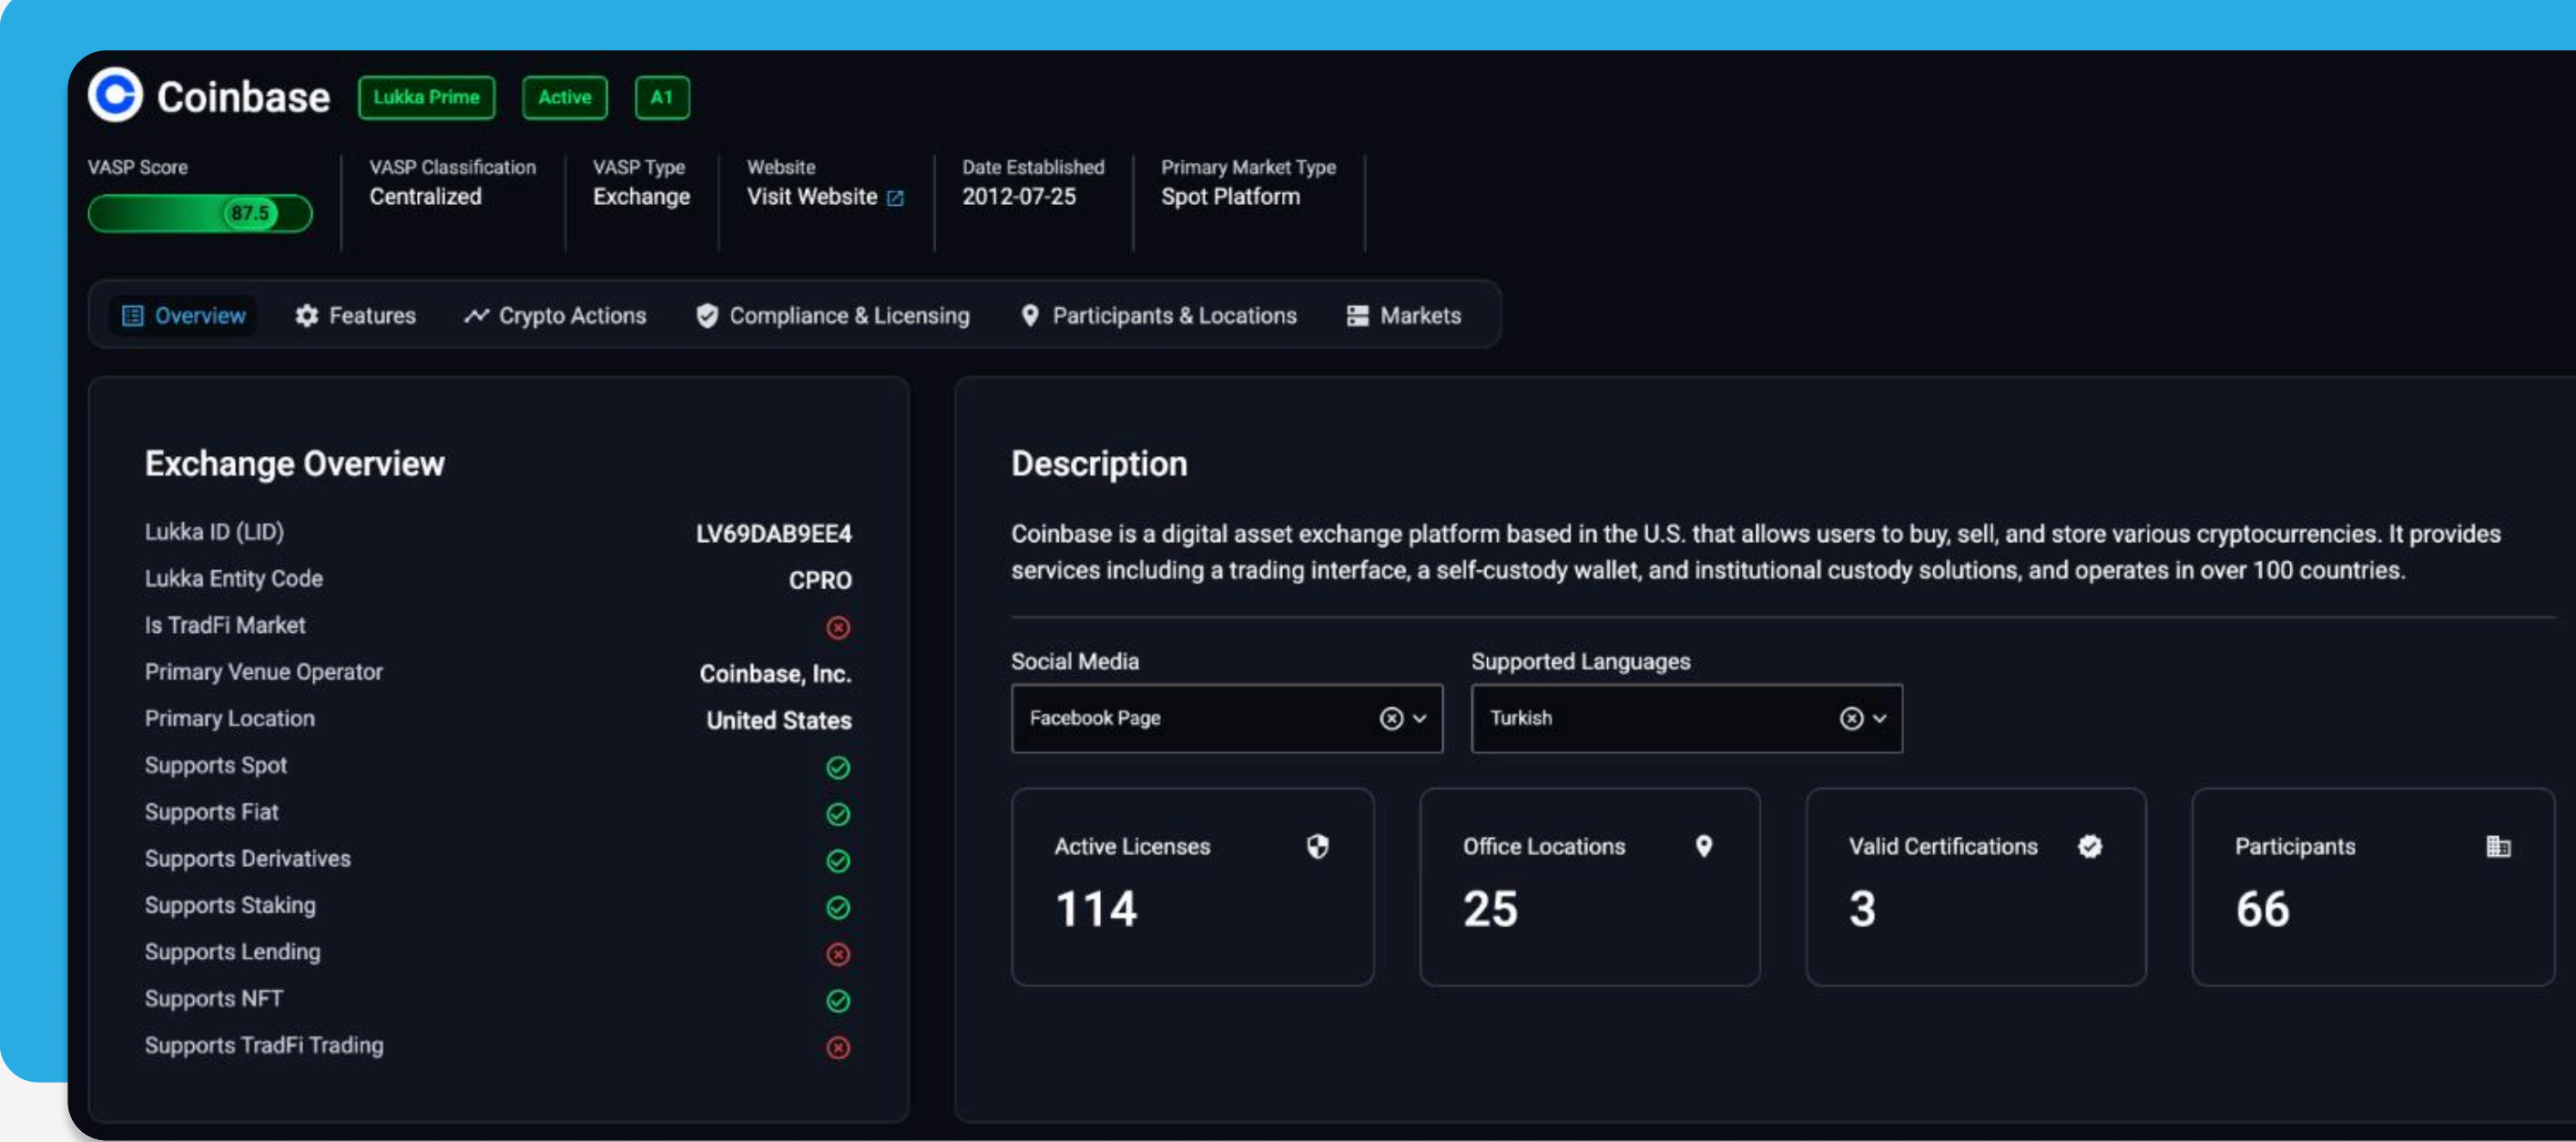

Establish trusted relationships across issuers, custodians, exchanges, banks, payment providers, and ecosystem participants.

Counterparty Intelligence

Evaluate licensing, jurisdictional, ownership, and operational information across digital asset service providers and financial institutions.

Regulatory Readiness

Support AML, sanctions, governance, reserve oversight, and compliance requirements through transparent and auditable intelligence infrastructure.

Ecosystem Intelligence

Lukka Intelligence

Transform reserve, market, compliance, and ecosystem activity into actionable intelligence across stablecoin operations.

Measure Adoption & Utilization

Monitor issuance growth, market activity, ecosystem participation, liquidity trends, and stablecoin utilization through a unified intelligence platform.

AI-Ready Financial Infrastructure

Deliver trusted intelligence into APIs, MCP-enabled workflows, copilots, agents, and next-generation financial applications.

Digital Asset Data You Can Trust

All of Lukka’s products are created with institutional standards, such as AICPA Service and Organization Controls (SOC), which focus on data quality, financial calculation accuracy & completeness, and managing technology operational risk. Lukka has obtained AICPA SOC 1 Type II and SOC 2 Type II Audits, an ISO/IEC-27001 certification, NIST Cybersecurity Assessment, and continues to lead the industry with best in class technology risk governance.
